Abstract: Section 316(b) of the Clean Water Act (CWA) provides that "[a]ny standard established pursuant to [CWA section 301] or [CWA section 306] and applicable to a point source shall require that the location, design, construction, and capacity of cooling water intake structures reflect the best technology available for minimizing adverse environmental impact."

The section 316(b) New Facility Rule (66 FR 65256; December 18, 2001) and minor amendments (68 FR 36749; June 19, 2003) implement section 316(b) of the CWA as it applies to new facilities that use cooling water intake structures (CWISs). The rule requires new facilities to submit several distinct types of information as part of their National Pollutant Discharge Elimination System (NPDES) permit application. In addition, the rule requires new facilities to maintain monitoring and reporting data as outlined by the Director in their NPDES permits. The information requirements in this Information Collection Request (ICR) are necessary to ensure that new facilities are complying with the rule's provisions, and thereby minimizing adverse environmental impact resulting from impingement and entrainment losses due to the withdrawal of cooling water.

Form Numbers: None.

Respondents/affected entities: State Governments, Private Entities

Respondent's obligation to respond: Mandatory per Clean Water Act (CWA) section 316(b).

Estimated number of respondents: 145 (total).

Abstract: This ICR calculates the burden and costs associated with managing and implementing the National Pretreatment Program as mandated under Clean Water Act (CWA) sections 402(a) and (b) and 307(b). This ICR includes all existing tasks under the National Pretreatment Program, as amended by the EPA's Streamlining Rule. EPA's Office of Wastewater Management (OWM) in the Office of Water (OW) is responsible for the management of the pretreatment program. The CWA requires EPA to develop national pretreatment standards to control discharges from Industrial Users (IUs) into POTWs. These standards limit the level of certain pollutants allowed in non-domestic wastewater that is discharged to a POTW. EPA administers the pretreatment program through the NPDES permit program. Under the NPDES permit program, EPA may approve State or individual POTW implementation of the pretreatment standards at their respective levels.

Abstract: EPA requires the collection of information by states interested in designating state waters under the Clean Water Act § 312(f) as areas prohibiting the discharge of treated or untreated sewage from vessels. There are two information collection activities covered by this ICR:

(A) Sewage No-discharge Zones: The need for EPA to obtain information for, or to support, the establishment of no-discharge zones (NDZs) for vessel sewage in state waters stems from CWA sections 312(f)(3), (f)(4)(A), and (f)(4)(B), and implementing regulations at 40 CFR 140.4. No-discharge zones are established to provide greater environmental protection of specified state waters from treated and untreated vessel sewage. This ICR addresses the information requirements associated with the establishment of NDZs for vessel sewage.

(B) UNDS No-discharge Zones: Under section 312(n) of the Clean Water Act ("Uniform National Discharge Standards
