SUPPLEMENTARY INFORMATION: The purpose of the Secretary of Energy Advisory Board's Panel on Emerging Technological Alternatives to Incineration is to provide independent external advice and recommendations to the Secretary of Energy Advisory Board on emerging technological alternatives to incineration for the treatment of mixed waste which the Department of Energy should pursue. The Panel will focus on the evaluation of emerging non-incineration technologies for the treatment of low-level, alpha low-level and transuranic wastes containing polychlorinated biphenyls (PCBs) and other hazardous constituents. Waste categories to be addressed include inorganic homogeneous solids, organic homogeneous solids, and soils. The Panel will also evaluate whether the emerging non-incineration technologies could be implemented in a manner that would allow the Department of Energy to comply with all legal requirements, including those contained in the Settlement Agreement and Consent Order signed by the State of Idaho, Department of Energy, and the U.S. Navy in October 1995.
