

the "transfer prices minus or plus Stelco's share of Baycoat's income or loss." (See Stelco's Section D response of November 23, 1998, at D-61.) Stelco did not report the actual transfer price, but only reported transfer price adjusted for profit and interest and G&A. (See Verification Exhibit C-16.) In making our adjustments to the cost reported by Stelco to obtain the transfer price, we added the difference between the transfer price and Stelco's reported cost. We did not adjust this difference for any amount of interest or G&A, because Stelco had adjusted transfer price for profit, interest and G&A.

Because we are subtracting Baycoat's G&A from Stelco's consolidated G&A in our COP and CV calculation in the final results, we must include it in our adjustments to Stelco's reported cost. We are correcting our calculations by adding the amount of Baycoat's interest and G&A to our adjustment of the first category coating services to arrive at an adjusted transfer price. We then subtract Baycoat's G&A per net ton for all Control Numbers (CONNUM) which obtained coating services.

Additional Changes to Final Results

Due to a clerical error in the preliminary results of this review, certain sales of CCC were not considered in the preliminary results calculation. For these final results of review, the Department has rectified this error and these sales have been included. For more information, please see the *Memorandum to the File Through Maureen Flannery from Sarah Ellerman; Analysis for Continuous Colour Coat, Ltd. for the Final Results of the Fifth Administrative Review of Corrosion-Resistant Carbon Steel from Canada for the period August 1, 1997 through July 31, 1998*, dated February 15, 2000.

Final Results of Reviews

As a result of our reviews, we determine the dumping margins (in percent) for the period August 1, 1997 through July 31, 1998 to be as follows:

Manufacturer/exporter	Margin (percent)
Corrosion-Resistant Carbon Steel Flat Products:	
CCC	1.01
Dofasco	0.16
National	5.65
Stelco	0.68
Cut-to-Length Carbon Steel Plate:	
MRM	0.00
Stelco	0.00

The Department will determine, and the U.S. Customs Service shall assess,

antidumping duties on all appropriate entries. In accordance with section 351.212(b), we calculated importer-specific *ad valorem* duty assessment rates for each class or kind of merchandise based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer for that class or kind of merchandise made during the POR. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of these final results for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for each reviewed company will be the rate stated above (except that no deposit will be required for firms with zero or *de minimis* margins, i.e., margins less than 0.5 percent); (2) for exporters not covered in this review, but covered in the LTFV investigation or a previous review, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a previous review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be the all others rates established in the LTFV investigations, which were 18.71 percent for corrosion-resistant steel products and 61.88 percent for CTL carbon steel plate (see *Amended Final Determinations of Sales at Less Than Fair Value and Antidumping Orders: Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate From Canada*, 60 FR 49582 (September 26, 1995)). These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

Notification of Interested Parties

This notice also serves as a final reminder to importers of their responsibility under section 351.402(f) of our regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with

this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with section 353.34 (1997). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

These administrative reviews and this notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and sections 351.213 and 351.221(b)(5) of our regulations.
