

plan for all phases of the data collection, including the 2021 main study, and requesting approval for all activities, materials, and response burden related to the field test recruitment was approved in April 2019 with a change request in September 2019 (OMB #1850–0645 v.11–12), while the submission describing all aspects of the field test and recruitment for the main study was approved in October 2019 (OMB #1850–0645 v.13). The submission for all aspects of the PIRLS 2021 main study, including data collection activities, with an accompanying 30-day public comment period was approved in May 2020 (OMB #1850–0645 v.14) with a change request in February 2021 (OMB #1850–0645 v.15). In summer 2021, NCES was notified by the IEA that teacher questionnaire data from the United States would not be included in the PIRLS international report or international database. At the same time, IEA requested changes to the school questionnaire to solicit information about the 2020–2021 school year. The exceptional circumstances of the 2021 PIRLS administration in the United States and these other countries (assessing fifth-grade students at the beginning of the academic year rather than fourth-grade students at the end of the academic year) present challenges for reporting and interpreting some PIRLS questionnaire data. This issue impacts other Northern Hemisphere countries administering the PIRLS teacher questionnaire to the teachers of fifth grade students in the fall of 2021. Due to the exclusion of teacher questionnaire data from international reporting and limitations in its use for national analysis, the U.S. PIRLS 2021 administration will no longer include a teacher questionnaire component. In accordance with the IEA's guidance, the school questionnaire has been modified to more adequately characterize the impact of the pandemic on students in countries assessing students at the beginning of fifth grade rather than at the end of the fourth grade. Note, for example, that the school questionnaire now asks questions about resources available to 4th grade students. The aim is to evaluate students at the beginning of their fifth-grade year, in light of what was available to them throughout their fourth-grade year. These changes will facilitate the inclusion of U.S. data in international reports that include findings from the school questionnaire.

Additional Information: An emergency clearance approval for the use of the system is described below due to the following conditions:

- NCES requests emergency clearance to allow us to continue recruiting schools for participation in a Fall 2021 data collection after substantive changes were required to an already approved and finalized data collection plan. The need for immediate clearance is due to the time sensitivity of this data collection, as normal clearance procedures would not allow NCES to follow the mandates set by the sponsoring international organization and make the required changes to the data collection while also respecting the timeline specified for this data collection. NCES will publish a **Federal Register** Notice soliciting 30 days of public comment on this collection concurrent with continued recruitment and data collection.

Dated: July 27, 2021.
