What information do we consider in our 5-year reviews?

A 5-year review considers all new information available at the time of the review. In conducting the review, we consider the best scientific and commercial data that have become available since the most recent status review. Specifically, we are seeking new information regarding:

1. Species biology, including but not limited to life history and habitat requirements and impact tolerance thresholds;
2. Historical and current population conditions, including but not limited to population abundance, trends, distribution, demographics, and genetics;
3. Historical and current habitat conditions, including but not limited to amount, distribution, and suitability;
4. Historical and current threats, threat trends, and threat projections in relation to the five listing factors (as defined in section 4(a)(1) of the ESA);
5. Conservation measures for the species that have been implemented or are planned; and
6. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information received will be considered during the 5-year review and may be useful in evaluating ongoing recovery programs for the species.

Request for New Information

To ensure that 5-year reviews are based on the best available scientific and commercial information, we request new information from all sources. Please use the contact information listed in the table above that is associated with the species for which you are submitting information. If you submit information,

please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

How do I ask questions or provide information?

If you wish to provide information for any species listed above, please submit your comments and materials to the appropriate contact in the table above. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your submission, you should be aware that your entire submission—including your personal identifying information—may be made publicly available at any time. Although you can request that personal information be withheld from public review, we cannot guarantee that we will be able to do so.

Authority

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Notice of Inventory Completion: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Peabody Museum of Archaeology and Ethnology, Harvard University has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control

of these human remains should submit a written request to the Peabody Museum of Archaeology and Ethnology. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Peabody Museum of Archaeology and Ethnology at the address in this notice by June 13, 2022.

FOR FURTHER INFORMATION CONTACT: Patricia Capone, Curator and NAGPRA Director, Peabody Museum of Archaeology and Ethnology, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–3702, email pcapone@fas.harvard.edu.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA. The human remains were removed from an unknown location.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Peabody Museum of Archaeology and Ethnology professional staff in consultation with representatives of The Chickasaw Nation.

History and Description of the Remains

At an unknown time, human remains representing, at minimum, one individual were removed from an unknown location. These human remains were originally part of the American Institute of Phrenology (formerly the American Craniological Museum). The collection of the American Institute of Phrenology was donated to the American Museum of Natural History in the late 1920s by

Jessie Y. Loomis in the name of Ernest Yates Loomis. In 1932, these human remains were transferred to the Peabody Museum of Archaeology and Ethnology as part of an exchange with the American Museum of Natural History. No known individual was identified. No associated funerary objects are present.

Osteological characteristics indicate that, more likely than not, these human remains are Native American. Furthermore, museum documentation describes the human remains as a “Chickasaw Indian.” This specific cultural attribution suggests that these human remains likely date to the Contact period. Consequently, a preponderance of the evidence shows that a relationship of shared group identity exists between The Chickasaw Nation and the earlier group to which these Native American human remains belong.

Determinations Made by the Peabody Museum of Archaeology and Ethnology, Harvard University

Officials of the Peabody Museum of Archaeology and Ethnology, Harvard University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and The Chickasaw Nation.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Patricia Capone, Curator and NAGPRA Director, Peabody Museum of Archaeology and Ethnology, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–3702, email pcapone@fas.harvard.edu, by June 13, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Chickasaw Nation may proceed.

The Peabody Museum of Archaeology and Ethnology, Harvard University is responsible for notifying The Chickasaw Nation that this notice has been published.

Dated: May 4, 2022.

Manager, National NAGPRA Program.
