

participate in any program to suppress grasshopper infestations. APHIS may opt to provide technical assistance, but any suppression program would be implemented by a Federal land management agency, a State agriculture department, a local government, or a private group or individual.

Insecticide applications at conventional rates or reduced agent area treatments. This alternative would update the information and technologies that were analyzed in the 2002 EIS. The insecticides available for use by APHIS include the U.S. Environmental Protection Agency-registered chemicals carbaryl, diflubenzuron, chlorantraniliprole, and malathion. Carbaryl and malathion are cholinesterase inhibitors which effects the nervous system. Diflubenzuron is an insect growth regulator. Chlorantraniliprole affects the nervous system by activating ryanodine receptors in insects. Only one insecticide would be used at a time, and would be applied at a rate that is normally or conventionally used for grasshopper suppression treatments, or could be applied as a reduced agent area treatment (RAATs). The RAATs strategy uses a reduced rate of insecticide from conventional levels by alternating treatment swaths in a spray block, reduced application rates, or both. The RAATs strategy suppresses grasshoppers within treated swaths, while conserving grasshopper predators and parasites in swaths that are not treated. An adaptive approach of either conventional rates or RAATs will allow the program to make site-specific suppression applications using a range of application rates to ensure adequate suppression.

We have identified the following potential environmental impacts or issues for further examination in the EIS:

- Effects on wildlife, including consideration of migratory bird species and changes in native wildlife habitat and populations, and federally listed endangered and threatened species.
- Effects on soil, air, and water quality.
- Effects on human health and safety.
- Effects on cultural and historic resources.
- Effects on economic resources.

All comments on this notice will be carefully considered in developing the final scope of the EIS. Upon completion of the draft EIS, a notice announcing its availability and an invitation to comment on it will be published in the **Federal Register**.

Done in Washington, DC, this 26th day of August 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
