SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Penile Implant Satisfaction in a Military Population; OMB control number 0720-PISM.

Needs and Uses: Inflatable Penile Prostheses (IPPs) are common procedures worldwide with over 53,000 American men aged ≥65 years-old undergoing penile implant surgery over a 9-year period. Despite the prevalence of these surgeries, the data on patient satisfaction has been limited. For example, Akakpo et al. (2017) evaluated almost 50 articles on patient satisfaction with penile implants from 2006–2016. 44% of the articles used questionnaires that were not intended for nor validated in IPP patients, while the remaining articles used proprietary, non-validated questionnaires.

These earlier IPP outcome assessments are problematic. The use of different instruments makes it difficult to compare results between studies. Thus, it is unsurprising that the satisfaction results vary widely. For example, one study found that 91% of IPP patients were 'very satisfied' whereas another study showed only 69% of men were satisfied with their IPP. This demonstrates the importance of a standardized IPP satisfaction questionnaire.

Recently, the first English-validated IPP satisfaction questionnaire- the Satisfaction Survey for Inflatable Penile Implant (SSIFI) was developed. This 16-item questionnaire assesses overall satisfaction, pain, function and appearance in men with IPPs. With the advent of SSIFI, it is vital that we use this novel instrument to accurately access IPP satisfaction in a military population.

The authority that authorizes this collection is: § 876.3350, 5 CFR 1320.5(d)(2), Title 10, Title 20, Title 42, American Urological Association, American Board of Urology, and the Sexual Medicine Society of North America.

The respondents are adult men with inflatable penile implants who are

patients at Madigan Army Medical Center. They are responding to this information collection as it will be part of their postoperative medical follow-ups. The survey will be given via Qualtrics, a web-based secure survey platform. Patients will access this via a QR code and answer the questions on their smartphones. They will complete the questions at the time of their medical follow-ups. This is returned electronically when they submit the survey.

Affected Public: Individuals and households.

Number of Respondents: 20.
