

alternative also includes an administrative change to the published times of use to align with how the complex is currently used for day-to-day training. Under Alternative 1, the ceiling of all the PRTC airspace would be raised to 60,000 feet during LFEs and increase the LFE days from 10 days total per year to a total of 30 days per year. Increasing the duration and frequency of LFEs would increase the total sorties conducted within PRTC by 50 percent for a total of 4,974.

For Alternative 2, the ceiling of Powder River 2, Gateway West, and Gateway East ATCAAs would be raised to 60,000 feet from the current 26,000 feet for day-to-day training. Currently Gateway East ATCAA is only available for LFEs. Under this alternative, Gateway East ATCAA would now be available for day-to-day training and the lateral dimensions of the Gateway West ATCAA would be reduced. Other changes would be the same as Alternative 1 and include an administrative change to the published times of use for day-to-day training, raising the ceiling of the entire complex to 60,000 feet during LFEs and increasing the LFE days to a total of 30 days per year.

For the No Action Alternative, DAF would not implement changes to the airspace structure or increase the total LFE days. Use of the PRTC for day-to-day training and LFEs would continue as it does currently.

The DAF and Cooperating Agencies will determine the scope of the analysis by soliciting comments from interested local, state, and federally elected officials and agencies, federally recognized Native American tribes, as well as interested members of the public. Comments are requested on identification of potential alternatives, information, and analyses relevant to the Proposed Action.

Acting Air Force Federal Register Liaison Officer.
