## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### Institute of Museum and Library Services

#### Submission for OMB Review, Comment Request, Proposed Collection: Native Hawaiian Library Services Grants Notice of Funding Opportunity

**AGENCY:** Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

**ACTION:** Submission for OMB Review, request for comments, collection of information.

**SUMMARY:** The Institute of Museum and Library Services announces that the following information collection has been submitted to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. This Notice proposes the renewal of the clearance of the Notice of Funding Opportunity for the Native Hawaiian Library Services Grants Program. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **FOR FURTHER INFORMATION CONTACT** section of this Notice.

**DATES:** Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before December 3, 2023.

**ADDRESSES:** Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this Notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection request by selecting “Institute of Museum and Library Services” under “Currently Under Review;” then check “Only Show ICR for Public Comment” checkbox. Once you have found this information collection request, select “Comment,” and enter or upload your comment and information. Alternatively, please mail your written comments to Office of Information and Regulatory Affairs, Attn.: OMB Desk Officer for Education, Office of Management and Budget, Room 10235, Washington, DC 20503, or call (202) 395–7316.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses).

## NUCLEAR REGULATORY COMMISSION

[Docket No. 70-00143; NRC-2022-0097]

### Nuclear Fuel Services, Inc.; U-Metal Project

**AGENCY:** Nuclear Regulatory  
Commission.

**ACTION:** Environmental assessment and  
finding of no significant impact;  
issuance.

**SUMMARY:** The U.S. Nuclear Regulatory  
Commission (NRC) is issuing a finding  
of no significant impact (FONSI) and  
accompanying environmental  
assessment (EA) regarding the NRC's  
consideration of a license amendment  
request to amend a Special Nuclear  
Material (SNM) license, SNM-124, held  
by Nuclear Fuel Service, Inc. (NFS) at  
the NFS site located in Erwin,  
Tennessee. If approved, the amendment  
would authorize NFS to operate  
uranium purification and conversion  
services (U-Metal Project) at the NFS  
site, pursuant to a contract with the U.S.  
Department of Energy's National  
Nuclear Security Administration. Based  
on the EA, the NRC staff has concluded  
that there will be no significant impacts  
to environmental resources from the  
requested license amendment, and  
therefore, a FONSI is appropriate.

**DATES:** The EA and FONSI referenced in  
this document is available on November  
6, 2023.

**ADDRESSES:** Please refer to Docket ID  
NRC-2022-0097 when contacting the  
NRC about the availability of  
information regarding this document.  
You may obtain publicly available  
information related to this document  
using any of the following methods:

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The NRC is considering issuance of a  
license amendment request to amend  
NFS's part 70 of title 10 of the *Code of  
Federal Regulations* (10 CFR) SNM  
license, SNM-124. The license  
amendment would authorize a change  
to current operations to include a U-  
Metal Project at NFS's site located in  
Erwin, Tennessee. As required by 10  
CFR part 51, "Environmental Protection  
Regulations for Domestic Licensing and  
Related Regulatory Functions," the NRC  
prepared an EA. Based on the results of  
the EA, the NRC has determined not to  
prepare an environmental impact  
statement (EIS) for the license  
amendment request and is issuing a  
FONSI.

NFS's 10 CFR part 70 license was  
originally issued by the Atomic Energy  
Commission to W.R. Grace and  
Company, Davison Chemical Division,  
on September 18, 1957. W.R. Grace and  
Company authorized initial facility  
operations with enriched uranium.  
Later, the license was transferred to NFS  
on December 31, 1963. The license was  
renewed on the following dates:  
November 5, 1965; January 27, 1978;  
March 16, 1979; June 9, 1992; and July

2, 1999. On August 9, 2012, the NRC  
renewed NFS's license SNM-124 for a  
period of 25 years, which will allow  
operations through 2037.

## II. Environmental Assessment

### Description of the Proposed Action

The proposed action is issuance of a  
license amendment to NFS's 10 CFR  
part 70 SNM license, SNM-124, to  
authorize construction and operation of  
the U-Metal Project at the NFS facility  
pursuant to a contract with the U.S.  
Department of Energy's National  
Nuclear Security Administration  
(NNSA).

The proposed action is described in  
the NFS's application and  
environmental report dated November  
18, 2021, as supplemented by letters  
dated on March 7, 2022, and January 31,  
2023.

### Need for the Proposed Action

The proposed action is needed for  
NFS to maintain the ability to convert  
oxides to metal, provide a redundancy  
for the purification of uranium metals,  
and hedge against the technology risk  
associated with a new electrorefining  
facility.

### Environmental Impacts of the Proposed Action

The NRC staff considered the  
potential impacts of the proposed action  
on land use, historical and cultural  
resources; visual and scenic resources;  
meteorology, climatology, and air  
quality; noise; geologic resource; water  
resources; ecological resources;  
socioeconomics; public and occupation  
health; transportation; environmental  
justice; and waste management. Given  
that construction would occur within  
the industrial facility footprint and  
within previous disturbed areas, and all  
other proposed activities would occur in  
an existing building, the activities  
associated with the proposed  
amendment would likely not alter any  
of the current characteristics of the site.  
Additionally, the proposed action  
would not result in significantly  
increased effluents. The proposed  
activities would not be expected to add  
to historical site contamination.  
Therefore, the proposed action would  
result in insignificant impacts and  
would not contribute to potential  
cumulative impacts when added to the  
past, present, or reasonably foreseeable  
future actions on the NFS site. Any  
future proposal to conduct NRC-  
regulated activities beyond the scope of  
the present license amendment would  
be evaluated, as appropriate, as part of
