Description

During 1939-1941, human remains representing, at minimum, 706 individuals were removed from numerous burial locations including at Tigara, Ipiutak, and Jabbertown, all within two miles of Point Hope, AK. These include ones from within what is presently referred to as the Ipiutak early village site that is now within a National Historic Landmark in the southern shore of Ipiutak Lagoon as well as a few from an early 20th century cemetery. The human remains, which are estimated to range in age from around 100 years old up to 2,500 years old, were removed under federal permit in 1939-1941 by archeologists Froelich Rainey and Helge Larsen and others associated with the University of Alaska (UAF) Museum in Fairbanks, AK (now the University of Alaska Museum of the North (UAMN)) and the American Museum of Natural History (AMNH). The human remains were all initially brought back to the AMNH where 701 are presently located with the other five in the UAMN. There are 2,174 associated funerary objects, with 1,462 in the AMNH and 712 in the UAMN.
