SUPPLEMENTARY INFORMATION:

Background

Section 4(c)(2) of the ESA requires that, at least every 5 years, the Secretary shall conduct a review of all ESA-listed species and determine whether any species should: (1) Be removed from such list; (2) be changed in status from an endangered species to a threatened species; or (3) be changed in status from a threatened species to an endangered species. In the Pacific Northwest, NMFS' reviews of the status of listed salmon and steelhead populations, and the extent to which the threats and other factors limiting the species' recovery have been addressed, are largely dependent upon monitoring information collected by state, tribal, and Federal co-managers. In an effort to provide more direction to agencies monitoring the status of ESA-listed salmon and

steelhead and their habitats, NMFS' Northwest Region has drafted guidance on monitoring the recovery of listed salmonids in the Pacific Northwest. This draft Pacific Northwest monitoring guidance will assist NMFS' recovery partners in Oregon, Washington, and Idaho in understanding the recovery monitoring needs under the ESA, and the desired level of statistical certainty for the monitoring information they collect. The draft monitoring guidance includes recommended priorities for monitoring, data collection, and reporting of the viability of Pacific Northwest salmon and steelhead populations, threats to the species, and the ESA Section 4(a)(1) listing factors.

Information Solicited

NMFS' Northwest Region is soliciting public comment on the draft guidance for monitoring the recovery of ESA-listed salmon and steelhead in Idaho, Oregon, and Washington. Specifically, NMFS' Northwest Region requests comment on the recommendations and priorities proposed in the draft Pacific Northwest monitoring guidance. In particular, we would like input on the proposed confidence intervals for status and trends monitoring of adult and juveniles, as well as on the targets for the relative abundance of hatchery- and natural-origin fish in spawning populations.
