BILLING CODE 6210-01-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Interest Rate on Overdue Debts

Section 30.13 of the Department of Health and Human Services' claims collection regulations (45 CFR Part 30) provides that the Secretary shall charge an annual rate of interest as fixed by the Secretary of the Treasury after taking into consideration private consumer rates of interest prevailing on the date that HHS becomes entitled to recovery. The rate generally cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the "Schedule of Certified Interest Rates with Range of Maturities." This rate may be revised quarterly by the Secretary of the Treasury and shall be published quarterly by the Department of Health and Human Services in the **Federal Register**.

The Secretary of the Treasury has certified a rate of 12 $\frac{3}{8}$ % for the quarter ended September 30, 2006. This interest rate will remain in effect until such time as the Secretary of the Treasury notifies HHS of any change.

Dated: November 1, 2006.

Jean Augustine,

Director, Office of Financial Policy and Reporting.

Centers for Disease Control and Prevention

[30Day-07-06AW]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

Supplement to the National Birth Defects Prevention Study: Qualitative Assessment of the Attitudes Mothers Have Toward Collecting Biological Specimens on their Infants and Young Children to Study Risk Factors for Birth Defects and Preterm Delivery—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC), has been conducting the National Birth Defects Prevention Study (OMB number 0920-0010, Exp. 5/31/2009) since 1997. The NBDPS is a case-control study of major birth defects that includes cases identified from existing birth defect surveillance registries in nine states, including metropolitan Atlanta. Control infants are randomly selected from birth certificates or birth hospital records. Mothers of case and control infants are interviewed using a computer-assisted telephone interview. Parents are asked to collect cheek cells from themselves and their infants for DNA testing. Information gathered from both the interviews and the DNA specimens will be used to study independent genetic and environmental factors as well as gene-environment interactions for a

broad range of carefully classified birth defects.

This proposed supplement to the National Birth Defects Prevention Study will use qualitative research to provide data on the barriers to participation in the collection of biological specimens by mothers on themselves, their infants, and young children. It is costly to implement the collection of biological specimens into an interview/questionnaire-based study. However, an ever-increasing number of studies include the examination of environmental and genetic interactions to help medical and public health professionals' better target appropriate interventions. A critical component for studies of gene variants is the collection of biological specimens. Participation and non-participation in the collection of biological specimens is not fully understood. We will conduct multiple well-designed focus groups to assess the attitudes of both mothers who participated and mothers who did not participate in the collection of biological specimens to increase the effectiveness of these studies. This information will be useful to many groups at the CDC who are currently collecting biological specimens from infants and their families but with less than optimal response rates and those who are working to implement studies that include the use of biological specimens.

Scientists from the National Birth Defects Prevention Study (NBDPS) in NCBDDD, the Pregnancy Risk Assessment Monitoring System (PRAMS) in NCCDPHP, and the Office of Genomics and Disease Prevention (OGDP) have received Collaborative Initiative intramural funding to conduct focus groups aimed at gaining insight into the barriers and motivations women have for participating in the collection of biological specimens. Among the three collaborating Centers within the Coordinating Center for Health Promotion, NCBDDD's National Birth Defects Prevention Study provides a unique opportunity for exploring the barriers and motivations toward collection of genetic material. This focus group project will recruit mothers who participated in the maternal interview for the National Birth Defects Prevention Study (NBDPS). There are no costs to the respondents other than their time. The total estimated annualized burden hours are 214.
