II. Background

A. What action is the agency taking?

In October 2009, the Agency initiated the Endocrine Disruptor Screening Program (EDSP) Tier 1 screening for the first list of 67 chemicals by issuing orders between October 29, 2009, and February 26, 2010, pursuant to the authority provided to EPA under section 408(p)(5) of FFDCA. The orders require the testing of chemicals through 11 Tier 1 screening assays. The purpose of the 11 Tier 1 screening assays is to determine the potential for a chemical

to interact with estrogen, androgen and thyroid hormone systems. Based on the data from the 11 Tier 1 assays, should the determination be made that the chemical is shown to interact, additional Tier 2 testing may be required.

EPA is seeking public comment on a December 6, 2011 petition from the Chemical Producers & Distributors Association (CPDA), the Halogenated Solvents Industry Alliance, Inc., and the People for the Ethical Treatment of Animals (PETA). The petition requested that the Agency abide by the Paperwork Reduction Act and Office of Management and Budget Terms of Clearance for the approved Information Collection Request (ICR) of the first list of 67 chemicals to receive orders under the Endocrine Disruptor Screening Program by demonstrating that the information collected: (1) Has practical utility in that it can distinguish whether a chemical has the potential to interact with the endocrine system or not; (2) has practical utility before proceeding with more Tier 1 screening orders for additional chemicals; and (3) is not duplicative of other information collection activities by the Agency but also is not duplicative of existing information.

B. What is the agency's authority for taking this action?

This action is taken under the authority of FFDCA section 408(p), 21 U.S.C. 346a(d)(3).
