

before receiving an access badge. Foreign nationals attending this meeting will be required to provide the following information: Full name; gender; date/place of birth; citizenship; visa/green card information (number, type, expiration date); passport information (number, country, expiration date); employer/affiliation information (name of institution, address, country, phone); title/position of attendee. To expedite admittance, attendees should provide identifying information in advance by contacting Glen Asner via e-mail at glen.asner@nasa.gov or by telephone at (202) 358-0903 by May 15, 2008.

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Dated: May 7, 2008.

P. Diane Rausch,

*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB Review;
Comment Request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104-13. This is the second notice for public comment; the first was published in the **Federal Register** at 73 FR 12470, and no substantial comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. Comments regarding (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or

other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street, NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send e-mail to splimpto@nsf.gov. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission may be obtained by calling 703-292-7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: 2008 Survey of Doctorate Recipients.

OMB Approval Number: 3145-0020.

Type of Request: Intent to seek approval to extend an information collection for three years.

1. Abstract

The Survey of Doctorate Recipients (SDR) has been conducted biennially since the 1970s. The 2008 SDR will consist of a sample of individuals under age 76 who have earned a science, engineering or health doctorate from a U.S. university. The purpose of this longitudinal study is to provide national estimates on the doctoral science, engineering and health workforce and changes in employment, education and demographic characteristics of that workforce. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering workforce.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to " * * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The SDR is designed to comply with these mandates by

providing information on the supply and utilization of the nation's doctoral scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT data system, which produces national estimates of the size and characteristics of the country's science and engineering personnel. The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

The National Opinion Research Center (NORC) at the University of Chicago will conduct the study for NSF. Data collection will begin in October 2008 by mail, Web survey and computer-assisted telephone interview. The survey will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and Privacy Act of 1974. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes.

2. Expected Respondents

A statistical sample of approximately 42,600 persons, identified as having a doctorate in a science, engineering or health field from a U.S. university will be contacted. The total response rate in 2006 was 79%.

3. Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. Assuming an 80% response rate, NSF estimates that the total burden for the 2008 SDR will be 15,200 hours.

Dated: May 12, 2008.

Suzanne H. Plimpton,

*Reports Clearance Officer, National Science
Foundation.*

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: 2008 National Survey of Recent College Graduates.

OMB Approval Number: 3145–0077.

Type of Request: Intent to seek approval to extend an information collection for three years.

1. Abstract

The National Survey of Recent College Graduates (NSRCG) has been conducted biennially since 1974. The 2008 NSRCG will consist of a sample of individuals who have recently completed bachelor's and master's degrees in science, engineering and health from U.S. institutions. The purpose of this study is to provide national estimates on the new entrants in the science and engineering workforce and to provide estimates on the characteristics of recent bachelor's and master's graduates with science, engineering, and health degrees. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering workforce.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “ * * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The NSRCG is designed to comply with these mandates by providing information on the supply and utilization of the nation's recent bachelor's and master's level scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering personnel. The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. NSF publishes statistics from the survey in many reports, but primarily in the biennial series, *Characteristics of Recent Science and Engineering Graduates in the United States*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

Mathematica Policy Research will conduct the study under contract for NSF. Data are obtained by mail questionnaire, computer assisted telephone interview and web survey beginning October 2008. The survey

will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and Privacy Act of 1974. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes.

2. Expected Respondents

A statistical sample of approximately 18,000 bachelor's and master's degree recipients in science, engineering, and health from the academic years 2006 and 2007 will be contacted in 2008. The total response rate in 2006 was 67%.

3. Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. Assuming a 80% response rate, NSF estimates that the total burden for the 2008 NSRCG will be 6,100 hours.

Dated: May 12, 2008.
