

C. Will the revised risk determination be peer reviewed?

The risk determination (Section 5 of the August 2020 1-BP Risk Evaluation (Ref. 2)) was not part of the scope of the Science Advisory Committee on Chemicals (SACC) peer review of the 1-BP risk evaluation. Thus, consistent with that approach, EPA did not conduct peer review of the final revised unreasonable risk determination for the 1-BP risk evaluation because no technical or scientific changes were made to the hazard or exposure assessments or the risk characterization.

V. Order Withdrawing Previous Order Regarding Unreasonable Risk Determinations for Certain Conditions of Use

EPA is also issuing a new order to withdraw the TSCA Section 6(i)(1) no unreasonable risk order issued in Section 5.4.1 of the August 2020 1-BP Risk Evaluation (Ref. 2). This final revised risk determination supersedes the condition of use-specific no unreasonable risk determinations in the August 2020 1-BP Risk Evaluation (Ref. 2). The order contained in Section 5.5 of the revised risk determination (Ref. 1) withdraws the TSCA section 6(i)(1) order contained in Section 5.4.1 of the August 2020 1-BP Risk Evaluation (Ref. 2). Consistent with the statutory requirements of section 6(a), the Agency will propose risk management action to address the unreasonable risk determined in the 1-BP risk evaluation.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The WARN Act gives the Commission authority to adopt relevant technical standards, protocols, procedures and other technical requirements governing Wireless Emergency Alerts (WEA). The Commission adopted rules to implement the WEA system (previously known as the Commercial Mobile

Service Alert System) pursuant to the WARN Act to satisfy the Commission's mandate to promote the safety of life and property through the use of wire and radio communication. The WEA system transmits emergency alerts to WEA-capable mobile devices, providing consumers with timely warnings and information in emergencies. In 2018, the Commission issued a Report & Order requiring that Participating Commercial Mobile Service Providers (providers) implement enhanced geo-targeting functionality by November 30, 2019 to allow WEA alert originators (*e.g.*, local emergency management offices) to target a WEA alert to eligible devices in a prescribed geographic area (*e.g.*, an area where there is imminent threat of the loss of life or property). See Federal Communications Commission, Wireless Emergency Alerts; Emergency Alert System, 83 FR 8619, 8623 (Feb. 28, 2018) (announcing a Nov. 30, 2019 amendment to 47 CFR 10.450).

The Commission now seeks to evaluate WEA performance, particularly with respect to the accuracy of providers' geo-targeting capabilities. To do so, the Commission will use surveys to collect information and evaluate performance during a WEA test. Survey respondents affiliated with two alert originators, partnered with the Commission in different geographic areas of the country, will be asked to complete a preliminary survey. This survey will improve the utility of a "live test" survey, which respondents will subsequently receive via a hyperlink embedded in a WEA test alert. The Commission has developed a survey, which is available at <https://www.fcc.gov/wea>. The Commission also made available a Spanish-language version of the test message at, <https://www.fcc.gov/wea-es>. The information sought in this collection is necessary and vital to ensuring that WEA is effective at protecting the life and property of the public.

Federal Communications Commission.

Secretary, Office of the Secretary.
