

the same long-run and short-run factor components as the two-factor model and adds a seasonality factor. Using historical data, OCC asserts that Energy Futures contracts, except for Energy Futures contracts on Brent Crude Oil and WTI Crude Oil, experience seasonality.¹⁷ To address seasonality, OCC will employ a trigonometric function,¹⁸ which it states will capture price dynamics in different seasons.

OCC stated its belief that the proposed enhancements to STANS are appropriately designed to support the clearance and settlement of Energy Futures contracts, based on model back testing results. Moreover, OCC asserts that the Energy Futures contracts are not new or novel contracts, and that the clearance and settlement of Energy Futures contracts will not present material risk to OCC.¹⁹

Schedule C to the Clearing Agreement

Pursuant to approved rule change 2015–OCC–03, OCC added a Schedule C to the Clearing Agreement to support the clearance and settlement of Energy Futures contracts and options on Energy Futures. Pursuant to the Clearing Agreement between OCC and NFX, OCC has agreed to clear the specifically enumerated contracts and may agree to clear and settle additional types of contracts should both parties execute a new Schedule C to the Clearing Agreement. This was necessary because Energy Futures contracts and options on Energy Futures were not enumerated in either the Previous Agreement, or in any existing Schedule C to the Previous Agreement. The approved rule change adds this new Schedule C to allow OCC to provide for the clearance and settlement of Energy Futures contracts and options on Energy Futures.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act²⁰ directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that the proposed rule change is consistent with the requirements of the Act and the

rules and regulations thereunder applicable to such organization. The Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act²¹ because it assures the safeguarding of securities and funds in the custody and control of OCC and permits OCC to risk manage Energy Futures contracts and options on Energy Futures through appropriate risk models as described above. Such risk models should reduce the risk that clearing members' margin assets will be insufficient in the event that OCC needs such assets to close-out the positions of a defaulted clearing member and, in turn also help protect investors and the public interest. Furthermore, the proposed rule change is also consistent with Rule 17Ad–22(b)(2) under the Act,²² because it will allow OCC to implement risk-based models and parameters to set margin requirements for clearing members who trade Energy Futures contracts and Energy Futures Options.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act²³ and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²⁴ that the proposed rule change (SR–OCC–2015–006) be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁵

Secretary.
