

- (2) High quality,
- (3) Moderate quality, or
- (4) Low quality.

To construct the funding slate, an average numerical score will be determined for each application through the following procedure. For each application, a numerical value of 3 will be assigned for each rating of exceptionally high quality that the application receives, a numerical value of 2 will be assigned for each rating of high quality that the application receives, a numerical value of 1 will be assigned for each rating of moderate quality that the application receives, and a numerical value of 0 will be assigned for each rating of low quality that the application receives. Then, for each application, the total of the numeric scores the application receives will be divided by the number of reviewers who rated that application to determine the average score for that application.

For this competition, potential applicants were invited to submit letters of intent. In the letter of intent, applicants identified the panel they thought was best suited to review their application. Applicants are hereby notified that the data in the letters of intent were collected for administrative purposes only. OERI reserves the right to assign any application to any panel where the agency believes the reviewers are best qualified to review that application.

Waiver of Proposed Rulemaking

In accordance with the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, because this notice merely establishes procedural requirements for review of applications and does not create substantive policy, proposed rulemaking is not required under 5 U.S.C. 553(b)(A).
