SUPPLEMENTARY INFORMATION:

Title: National Visitor Use Monitoring.

OMB Number: 0596-0110.

Expiration Date of Approval: April 30, 2010.

Type of Request: Extension with no revision.

Abstract: The Government Performance and Results Act of 1993 requires that Federal agencies establish measurable goals and monitor their success at meeting those goals. Two of the items the Forest Service must measure are: (1) The number of visits that occur on the National Forest System lands for recreation and other purposes, and (2) the views and satisfaction levels of recreational visitors to National Forest System lands about the services, facilities, and settings. The agency receives requests for this kind of information from a variety of organizations, including Congressional staffs, newspapers, magazines, and recreational trade organizations.

The data from this collection provides vital information for strategic planning efforts, decisions regarding allocation of resources, and revisions of land and resource management plans for national forests. It provides managers with reliable estimates of the number of recreational visitors to a national forest, activities of those visitors (including outdoor physical activities), customer satisfaction, and visitor values. The knowledge gained from this effort helps identify recreational markets as well as the economic impact visitors have on an area. The information collected is also used by the Office of Management and Budget as part of the Program Analysis Reporting Tool measures for the Forest Service recreation program. For the Forest Service, the collection is designed for a five-year cycle of coverage across all national forests. Conducting the collection less frequently puts information updates out of cycle with forest planning and other data preparation activities.

To conform to the Southern Nevada Public Land Management Act (SNPLMA), the National Park Service, Bureau of Land Management, and U.S. Fish and Wildlife Service (all United States Department of Interior (USDI) agencies) will be utilizing this collection once every five years to obtain credible and mutually comparable estimates of recreational use on lands they administer in Clarke County, Nevada. This collection helps ensure a timely
