The Second Order addressed several matters relating to the obligation of television licensees to provide educational programming for children and the obligation of television licensees and cable operators to protect children from excessive and inappropriate commercial messages. Among other things, the Second Order adopts a children's programming preemption policy. This policy requires all networks requesting preemption flexibility to file a request with the Media Bureau by August 1 of each year. The request identifies the number of preemptions the network expects, when the program will be rescheduled, whether the rescheduled time is the program's second home, and the network's plan to notify viewers of the schedule change. Preemption flexibility requests are not mandatory filings. They are requests that may be filed by networks seeking preemption flexibility.

Needs and Uses

The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) for approval of an extension request (no change in the public reporting and/or recordkeeping requirement). There is no change in the Commission's previous burden estimates.

Under 47 CFR 1.929(c)(1) of the Commission's rules, any increase in the composite interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service, Rural Radiotelephone Service, or 800 MHz Specialized Mobile Radio Service is a major modification of a license that requires prior Commission approval.

However, in February 2005, the Commission adopted and released final rules which amended section 1.929(c)(1) to specify that expansion of a composite interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service—as well as the Rural Radiotelephone Service and 800 MHz Specialized Mobile Radio Service—over water on a secondary, non-interference basis should be classified as a minor (rather than major) modification of a license. Such reclassification has eliminated the filing requirements associated with these license modifications, but requires site-based licensees to provide the geographic area licensee (on the same frequency) with the technical and engineering information necessary to evaluate the site-based licensee's operations over water.
