Background

The Social Security Act mandates periodic redeterminations of the non-medical factors that relate to the SSI

recipients' continuing eligibility for SSI payments. Recent SSA studies have indicated that as many as 2/3 of all scheduled redeterminations completed, with the assistance of a SSA employee, did not result in any change in circumstances that affected payment. Therefore, SSA will conduct a limited test to determine whether a less intrusive and labor intensive redetermination process could result in significant operational savings and a decrease in recipient inconvenience,

while timely obtaining the accurate data needed to determine continuing eligibility through the process.

The Collection

A limited test of forms SSA-3988-TEST and SSA-3987-TEST will be used to determine whether SSI recipients have met and continue to meet all statutory and regulatory non-medical requirements for SSI eligibility, and whether they have been and are still receiving the correct payment amount.

The SSA-3988-TEST and SSA-3987-TEST are designed as self-help forms that will be mailed to recipients or to their representative payees for

completion and return to SSA. The test objectives are to determine the public's ability to understand and accurately complete the test forms. The

respondents are recipients of SSI benefits or their representatives.

	Respondents	Frequency of response	Average burden per response (min)	Estimated annual burden
SSA-3988-TEST	13,600	1	20	4,533
SSA-3987-TEST	2,400	1	20	800
Total burden hours				5,333
