[Docket No. CP06-85-000]

CenterPoint Energy Gas Transmission Company; Notice of Application

March 17, 2006.

On March 10, 2006, in Docket No. CP06-85-000, CenterPoint Energy Gas Transmission Company (CEGT), pursuant to section 7(c) of the Natural Gas Act, as amended, and section 157 subpart A of the Federal Energy Regulatory Commission's (Commission) regulations requests authorization to construct, own, and operate the Carthage to Perryville Project designed to receive and transport 1.237 billion cubic feet per day of natural gas. The project would consist of: 171.9 miles of 42-inch diameter pipeline; compression totaling 41,240 hp at two compressor stations; meter and regulator stations at receipt points with 3 Texas intrastate pipelines; interconnections with 4 interstate pipelines; and, appurtenant facilities. The facilities will operate separately from CEGT's existing pipeline system, and CEGT is seeking implementation of a fixed charge for Fuel Use and Lost and Unaccounted For Gas (LUFUG) applicable to transportation on the new facilities, all as more fully described in the application. CEGT seeks waiver of the Commission's regulations such that the 30-day comment period for the Final Environmental Impact Statement may coincide with the 30-day requested certificate order's rehearing period and that notational voting be used to extent this approach would expedite the order's issuance. CEGT requests that the Commission issue requested authorizations by October 30, 2006 so that facilities may be operable in time
