DEPARTMENT OF THE INTERIOR

National Park Service

Right of Way Request, Environmental Assessment or Environmental Impact Statement, Chesapeake and Ohio Canal National Historical Park; Correction

AGENCY: National Park Service, Interior.

ACTION: Notice; correction.

SUMMARY: The National Park Service published a document in the **Federal Register** of September 13, 2002, concerning request for comments on a Right of Way Request, Environmental Assessment or Environmental Impact Statement at Chesapeake and Ohio Canal National Historical Park. The second and third sentences of the first paragraph of the Summary were incorrect.

FOR FURTHER INFORMATION CONTACT: Kevin Brandt, 301-714-2201.

Correction

In the **Federal Register** of September 13, 2002, in FR Doc. 02-23370, on page 58072, in the second column, correct the first paragraph of the SUMMARY by eliminating the second and third sentences and inserting the following sentence to read:

The area under consideration for the proposed crossing is between the U.S. 15 bridge area and the Nolands Ferry boat ramp area along the canal near the community of Point of Rocks in Frederick County, Maryland.

Dated: September 13, 2002.

Kevin Brandt,

Assistant Superintendent, Chesapeake and Ohio Canal National Historical Park.

Chesapeake Bay Special Resource Study

AGENCY: National Park Service.

ACTION: Notice of Intent to prepare an Environmental Impact Statement and to

Hold Public Scoping Meetings for the Chesapeake Bay Special Resource Study.

SUMMARY: This notice announces the intent to prepare an environmental impact statement and hold public scoping meetings for the Chesapeake Bay Special Resource Study.

The Fiscal Year 1999 appropriations bill for the Department of the Interior and related agencies included direction to the National Park Service to conduct a Chesapeake Bay Special Resource Study. The purpose of the study is to explore the appropriateness of representing additional Chesapeake Bay resource areas within the national park system and determine whether this would help advance the partnership effort to conserve and restore the Chesapeake Bay; to determine what type of resource(s) and concept(s) might be appropriate, if any; and to make recommendations to Congress regarding these findings. Such recommendations will focus on overall concepts and criteria, rather than evaluating specific sites. Direct input from political, environmental, business and community leaders, as well as local citizens, will help develop these concepts and criteria.

Four public meetings will be held in September 2002 to discuss the Chesapeake Bay Special Resource Study being undertaken by the National Park Service and to conduct scoping for an associated Environmental Impact Statement. The study is authorized by the fiscal year 1999 appropriations bill for the Department of the Interior. For information on specific meeting dates and locations may be obtained from <http://www.chesapeakestudy.org> or by contacting Jonathan Doherty, National Park Service Chesapeake Bay Program Office, 410 Severn Avenue, Suite 109, Annapolis, MD 21403, 410 267 5725, jdoherty@chesapeakebay.net.

Dated: June 27, 2002.

Pat Phelan,

Acting Director, Northeast Region.

National Park Service

Notice of Intent To Prepare an Environmental Impact Statement on the Backcountry Management Plan and General Management Plan Amendment for Gates of the Arctic National Park and Preserve

AGENCY: National Park Service, Interior.

ACTION: Backcountry Management Plan, General Management Plan Amendment, and Environmental Impact Statement, Gates of the Arctic National Park and Preserve, Alaska.

SUMMARY: The National Park Service (NPS) is amending the Gates of the Arctic National Park and Preserve General Management Plan with a Backcountry Management Plan and accompanying Environmental Impact Statement (plan/EIS). Gates of the Arctic National Park and Preserve was established by the 1980 Alaska National Interest Lands Conversation Act (ANILCA). With passage of ANILCA, Congress designated 7.2 million acres of wilderness within the park and set forth special provisions for management in recognition of the unique situations and traditional lifeways of Alaska.

The purpose of the plan/EIS is to formulate a comprehensive plan that will provide management direction during the next 15-20 years for the backcountry of Gates of the Arctic National Park and Preserve. The backcountry consists of all of the acreage within the park and preserve boundary, including 7.2 million acres of designated wilderness. Tracts in private ownership are excluded.

Gates of the Arctic National park and Preserve is one of four national park units in Alaska to initiate a backcountry management planning process and GMP amendment. This notice of intent is being published simultaneously with notices to prepare plan/EISs for Glacier Bay National Park and Preserve and Wrangell-St. Elias National Park and Preserve. A plan/EIS for Denali National Park and Preserve is underway (64 FR 49503, September 13, 1999).

The Gates of the Arctic National Park and Preserve plan/EIS is being prepared in response to the increasing level and diversity of activities in the park, resource management and protection needs, and requests for activities and facilities not anticipated or addressed in the 1986 General Management Plan. Specific topics to be addressed in the plan/EIS include, but are not limited to: backcountry hiking, sport hunting, mountaineering, aviation, boating, snowmobiling, dogsledding, commercial services, administrative and scientific/research activities, and the various facilities related to these activities.

The proposed action and other action alternatives will assess variations in the types and levels of backcountry activities and facilities. Toward this end, prescriptive management zones will be described and allocated to park land to provide a spectrum of visitor experience opportunities, resource
