

project at the proposed Cambridge site would necessitate upgrading approximately 47 miles of existing 69-kilovolt (kV) transmission lines. Construction at the alternative Elk River site would necessitate upgrading approximately 27 miles of existing 69-kV transmission lines to allow the electricity from the new generator to be reliably delivered from the site. A fuel oil-fired combustion turbine rated at approximately 20 MW exists at the proposed Cambridge site and will remain in operation at the site after construction of the proposed combustion turbine. Additional land would be acquired to facilitate the proposed construction activities. The project at the Cambridge site would include upgrades to the existing substation at the Cambridge plant site. A 10-inch high pressure gas lateral pipeline approximately 1/2-mile long would be constructed to provide a natural gas fuel supply for the project.

GRE prepared an environmental analysis for RUS that describes the project and assesses the proposed projects environmental impacts. RUS has conducted an independent evaluation of the environmental analysis and believes that it accurately assesses the impacts of the proposed project. This environmental analysis will serve as RUS' environmental assessment (EA) of the project.

EA is available at GRE's Web site at <http://www.greatriverenergy.com/>. It is also available for public review at the RUS or GRE at the addresses provided in this notice or at the following locations:

Cambridge Public Library, 244 South Birch Street, Cambridge, Minnesota 55008, Tel: (763) 689-7390
Elk River Public Library, 413 Proctor Avenue, Elk River, Minnesota 55330, Tel: (763) 441-1641

Questions and comments should be sent to RUS at the address provided in this notice. RUS will accept questions and comments on the EA for 30 days from the date of publication of this notice.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal environmental laws and regulations and completion of environmental review procedures as prescribed by the 7 CFR part 1794, Environmental Policies and Procedures.
