SUPPLEMENTARY INFORMATION: The information collection under the requirements of FERC-523 "Applications for Authorization of Issuance of Securities."

Under Federal Power Act (FPA) section 204, 16 U.S.C. 824c:

"No public utility or licensee shall issue any security, or assume any obligation or liability as guarantor, indorser, surety, or otherwise in respect of any security of another person, unless and until, and then only to the extent that, upon application by the public utility, the Commission by order authorized such issue or assumption of the liability. The Commission shall make such order if it finds that such issue or assumption (a) is for lawful object, within the corporate purposes of the applicant and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the applicant of service as a public utility and which will not impair its ability to perform that service, and (b) is reasonably necessary or appropriate for such purposes.* * *

The Commission uses the information contained in filings to determine its acceptance and/or rejection for granting applications for authorization to either issue securities or to assume an obligation or liability by the public utilities and their licensees who make these applications.

The Commission implements this statute through its regulations, which are found at 18 CFR part 34; sections 131.43 and 131.50 of 18 CFR Part 131 prescribe the required format for the filings. The information is filed electronically.

Action: The Commission is requesting a three-year extension of the current expiration date with no changes to the current reporting requirements.

Burden Statement: Public reporting burden for this collection is estimated as:

| Number of responses annually (1) | Number of responses per respondent (2) | Average burden hours per response (3) | Total annual burden hours (1)×(2)×(3) |
|-------------------------------------|---|--|--|
| 60 | 1 | 88 | 5280 |

The estimated total cost to respondents is \$320,821 [5,280 hours divided by 2080 hours¹ times \$126,384² equals \$320,821]. The cost of filing FERC-523, per respondent, is \$5,347 (rounded-off).

¹ Number of hours an employee works each year.

² Average annual salary per employee 3.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, using technology and systems for the purposes of collecting, validating, verifying, processing, maintaining,

disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable filing instructions and requirements; (4) training personnel to respond to this collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise

disclosing the information. The cost estimate for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on the accuracy of the agency's burden estimate of the proposed information collection, including the validity of the methodology and assumptions used to calculate the reporting burden; and ways to enhance the quality, utility and clarity of the information to be collected.

Kimberly D. Bose,
Secretary.
