

Energy Center Project to be located approximately 1.0 mile southwest of the Town of Bluefield in Tazewell County, Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of one of the following two alternatives:

Alternative 1—(1) a new 3,263-foot-long, 380-foot-high concrete-face rockfill dam for the upper reservoir with a 150-foot-long concrete-lined emergency spillway; (2) a new 1,723-foot-long, 288-foot-high concrete-face rockfill dam for the lower reservoir with a 150-foot-long concrete-lined emergency spillway; (3) a new upper reservoir with a surface area of 112 acres and a storage capacity of 8,173 acre-feet at a surface elevation of 3,830 feet above mean sea level (msl); (4) a new lower reservoir with a surface area of 96 acres and a storage capacity of 8,173 acre-feet at a surface elevation of 3,238 feet msl; (5) a new 9.5-mile-long water source conveyance from the proposed water source to the project; (6) a new 5,235-foot-long penstock connecting the upper and lower reservoirs; (7) a new 250-foot-long, 100-foot-wide, 150-foot-high underground reinforced-concrete powerhouse containing two pump-turbine generator units with a total rated capacity of 446 megawatts (MW) and a rated gross hydraulic head of 621 feet; (8) a new switchyard/substation that ties directly into an existing 765-kilovolt (kV) transmission line; and (9) appurtenant facilities.

Alternative 2—(1) a new 3,263-foot-long, 380-foot-high concrete-face rockfill dam for the upper reservoir with a 150-foot-long concrete-lined emergency spillway; (2) a new 1,680-foot-long, 257-foot-high concrete-face rockfill dam for the lower reservoir with a 150-foot-long concrete-lined emergency spillway; (3) a new upper reservoir with a surface area of 112 acres and a storage capacity of 11,135 acre-feet at a surface elevation of 3,830 feet msl; (4) a new lower reservoir with a surface area of 144 acres and a storage capacity of 11,135 acre-feet at a surface elevation of 2,937 feet msl; (5) a new 10.5-mile-long water source conveyance from the proposed water source to the project; (6) a new 4,965-foot-long penstock connecting the upper and lower reservoirs; (7) a new 350-foot-long, 100-foot-wide, 150-foot-high underground reinforced-concrete powerhouse containing three pump-

turbine generator units with a total rated capacity of 870 MW and a rated gross hydraulic head of 887 feet; (8) a new switchyard/substation that ties directly into an existing 765-kV transmission line; and (9) appurtenant facilities.

Under both alternatives, mine water would serve as the water source for the initial fill and makeup water.

The proposed project would have an annual generation of 1,302 gigawatt-hours (GWh) and 2,540 GWh for alternatives 1 and 2, respectively.

Applicant Contacts: Michael Regulinski, Dominion Energy Virginia, 120 Tredegar Street, RS-2, Richmond, Virginia 23219; phone: 804-819-2794, and Michael Swiger, Van Ness Feldman, LLP, 1050 Thomas Jefferson Street NW., Washington, DC 20007; phone: 202-298-1891.

FERC Contact: Woohee Choi; phone: (202) 502-6336.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Competing applications and notices of intent must meet the requirements of 18 CFR 4.36.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, notices of intent, and competing applications using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-14854-000.

More information about this project, including a copy of the application, can be viewed or printed on the "eLibrary" link of the Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-14854) in the docket number field to access the document. For assistance, contact FERC Online Support.

Dated: September 29, 2017.

Nathaniel J. Davis, Sr.,
Deputy Secretary.

[Docket No. IS17-522-000]

Colonial Pipeline Company; Notice of Technical Conference

The Commission's September 7, 2017 order in the above-captioned proceeding¹ directed that a technical conference be held to address the effect of the tariff changes proposed by Colonial Pipeline Company in its June 23, 2017 filing in this docket.

Take notice that a technical conference will be held on Wednesday, October 25, 2017 at 9:00 a.m., in a room to be designated at the offices of the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

FERC conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations please send an email to accessibility@ferc.gov or call toll free (866) 208-3372 (voice) or (202) 502-8659 (TTY), or send a fax to (202) 208-2106 with the required accommodations.

All interested persons and staff are permitted to attend. For further information please contact David Faerberg at (202) 502-8275 or email David Faerberg at David.Faerberg@ferc.gov.

Dated: September 29, 2017.

Nathaniel J. Davis, Sr.,
Deputy Secretary.

DEPARTMENT OF ENERGY

Western Area Power Administration

Final 2018 Olmsted Power Marketing Plan and Call for Applications

AGENCY: Western Area Power
 Administration, DOE.

ACTION: Notice of Final 2018 Olmsted
 Power Marketing Plan and Call for
 Applications.

SUMMARY: Western Area Power
 Administration (WAPA), a Federal
 power marketing agency of the
 Department of Energy, announces its
 Final 2018 Olmsted Power Marketing
 Plan and Call for Applications for an
 allocation of energy from the Olmsted
 Powerplant Replacement Project.

DATES: Applications and Applicant
 Profile Data are due December 11, 2017
 to be assured of consideration by
 WAPA.

ADDRESSES: Send applications to: Ms.
 Lynn Jeka, CRSP Manager, CRSP
 Management Center, Western Area
 Power Administration, 150 East Social
 Hall Avenue, Suite 300, Salt Lake City,
 UT 84111–1580. Applications may also
 be faxed to (801) 524–5017 or emailed
 to jeka@wapa.gov.

FOR FURTHER INFORMATION CONTACT: Mr.
 Brent Osiek, Power Marketing Manager,
 (801) 524–5495; or Mr. Lyle Johnson,
 Public Utilities Specialist, (801) 524–
 5585. Written requests for information
 should be sent to CRSP Management
 Center, Western Area Power
 Administration, 150 East Social Hall

Avenue, Suite 300, Salt Lake City, UT
 84111–1580; faxed to (801) 524–5017; or
 emailed to ljohnson@wapa.gov.

SUPPLEMENTARY INFORMATION: The
 United States acquired the Olmsted
 Powerplant in 1990 through
 condemnation proceedings in order to
 secure the water rights associated with
 the Olmsted Powerplant deemed
 essential to the Central Utah Project
 (CUP). The CUP is a participating
 project of the Colorado River Storage
 Project. As part of the condemnation
 proceedings, PacifiCorp continued
 Olmsted operations until 2015; after
 which time, the operation of the facility
 became the responsibility of the Bureau
 of Reclamation.

The existing Olmsted Powerplant
 greatly exceeded its operational life, and
 a replacement facility was needed for
 the generation of power and
 preservation of associated non-
 consumptive water rights. On February
 4, 2015, an Implementation Agreement
 (Agreement) for the Olmsted Powerplant
 Replacement Project (Project) was
 signed by Central Utah Water
 Conservancy District (District), the
 Department of the Interior, Bureau of
 Reclamation, and WAPA (Participants).
 The Agreement sets forth the
 responsibilities of the Participants and
 identifies funding of the Project. The
 District will construct, operate,
 maintain, and replace the Olmsted
 Powerplant and incidental facilities in
 connection with its CUP operations,
 including power generation.

WAPA is responsible for marketing
 the Olmsted energy, which is
 anticipated to be first available in the
 summer of 2018. Power production will
 be incidental to the delivery of water
 and will only be available when water
 is present. Therefore, only energy,
 without capacity, will be available for
 marketing. It is expected that the annual
 energy production from the replacement
 Olmsted Powerplant will average
 around 27,000,000 kWh per year.

Response to Comments on the Olmsted Proposed Marketing Criteria

WAPA received numerous comments
 on its Proposed 2018 Olmsted Power
 Marketing Plan during the comment
 period. WAPA reviewed and considered
 all comments received, and this section
 summarizes and responds to the
 comments received. For brevity, when it
 was possible to do so without affecting
 the meaning of the statements, the
 public comments below were
 paraphrased.

Comment: Can WAPA explain how it
 determined the marketing area? How
 were certain Utah counties picked? Is it
 based on the Provo River drainage? Why
