Needs and Uses: The information collection requirements approved under this collection are as follows:

a. 47 CFR 74.787(a)(2)(iii) provides that mutually exclusive LPTV and TV translator applicants for companion digital stations will be afforded an opportunity to submit in writing to the Commission, settlements and engineering solutions to resolve their situation.

b. 47 CFR 74.787(a)(3) provides that mutually exclusive applicants applying for construction permits for new digital stations and for major changes to existing stations in the LPTV service will similarly be allowed to submit in writing to the Commission, settlements and engineering solutions to rectify the problem.

c. 47 CFR 74.787(a)(4) provides that mutually exclusive displacement relief applicants filing applications for digital LPTV and TV translator stations may be resolved by submitting settlements and engineering solutions in writing to the Commission.

d. 47 CFR 74.787(a)(5)(v) states that a license for a digital-to-digital replacement television translator will be issued only to a full-power television broadcast station licensee that demonstrates in its application a loss in the station’s pre-auction digital service area as a result of the broadcast television spectrum incentive auction, including the repacking process, conducted under section 6403 of the Middle Class Tax Relief and Job

Creation Act of 2012 (Pub. L. 112–96). “Pre-auction digital service area” is defined as the geographic area within the full power station’s noise-limited contour (as set forth in Public Notice, DA 15–1296, released November 12, 2015). The service area of the digital-to-digital replacement translator shall be limited to only the demonstrated loss area within the full power station’s pre-auction digital service area, provided that an applicant for a digital-to-digital replacement television translator may propose a de minimis expansion of its full power pre-auction digital service area upon demonstrating that the expansion is necessary to replace a loss in its pre-auction digital service area.

e. 47 CFR 74.790(f) permits digital TV translator stations to originate emergency warnings over the air deemed necessary to protect and safeguard life and property, and to originate local public service announcements (PSAs) or messages seeking or acknowledging financial support necessary for its continued operation. These announcements or messages shall not exceed 30 seconds each, and be broadcast no more than once per hour.

f. 47 CFR 74.790(e) requires that a digital TV translator station shall not retransmit the programs and signal of any TV broadcast or DTV broadcast station(s) without prior written consent of such station(s). A digital TV translator operator electing to multiplex signals must negotiate arrangements and obtain written consent of involved DTV station licensee(s).

g. 47 CFR 74.790(g) requires a digital LPTV station who transmits the programming of a TV broadcast or DTV broadcast station received prior written consent of the station whose signal is being transmitted.

h. 47 CFR 74.794 mandates that digital LPTV and TV translator stations operating on TV channels 22–24, 32–36 and 38 with a digital transmitter not specifically FCC-certificated for the channel purchase and utilize a low pass filter or equivalent device rated by its manufacturer to have an attenuation of at least 85 dB in the GPS band. The licensees must retain with their station license a description of the low pass filter or equivalent device with the manufacturer’s rating or a report of measurements by a qualified individual.

i. 47 CFR 74.796(b)(5) requires digital LPTV or TV translator station licensees that modify their existing transmitter by use of a manufacturer-provided modification kit would need to purchase the kit and must notify the Commission upon completion of the transmitter modifications. In addition, a

digital LPTV or TV translator station licensees that modify their existing transmitter and do not use a manufacturer-provided modification kit, but instead perform custom modification (those not related to installation of manufacturer-supplied and FCC-certified equipment) must notify the Commission upon completion of the transmitter modifications and shall certify compliance with all applicable transmission system requirements.

j. 47 CFR 74.796(b)(6) provides that operators who modify their existing transmitter by use of a manufacturer-provided modification kit must maintain with the station's records for a period of not less than two years, and will make available to the Commission upon request, a description of the nature of the modifications, installation and test instructions, and other material provided by the manufacturer, the results of performance-tests and measurements on the modified transmitter, and copies of related correspondence with the Commission. In addition, digital LPTV and TV translator operators who custom modify their transmitter must maintain with the station's records for a period of not less than two years, and will make available to the Commission upon request, a description of the modifications performed and performance tests, the results of performance-tests and measurements on the modified transmitter, and copies of related correspondence with the Commission.

k. Protection of Analog LPTV. In situations where protection of an existing analog LPTV or translator station without a frequency offset prevents acceptance of a proposed new or modified LPTV, TV translator, or Class A station, the Commission requires that the existing non-offset station install at its expense offset equipment and notify the Commission that it has done so, or, alternatively, negotiate an interference agreement with the new station and notify the Commission of that agreement.

l. 47 CFR 74.798 requires all stations in the low power television services to provide notice of their upcoming digital transition to their viewers.
