

review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through May 31, 2022. Public comments were previously requested, via the **Federal Register**, on February 8, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before June 27, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2020–0664, to: (1) EPA online using <https://www.regulations.gov/> (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov/>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number

for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The Emission Guidelines and Compliance Times for Small Municipal Waste Combustion Units Constructed on or Before August 30, 1999 were originally promulgated in December 1995, but were vacated by the Federal Court in March 1997. Subsequently, the Emission Guidelines were re-proposed on August 30, 1999; and promulgated on December 6, 2000. The Emission Guidelines regulate organics (dioxin/furans), metals (cadmium, lead, mercury), particulate matter, and acid gases (hydrogen chloride, sulfur dioxide, and nitrogen oxides) for small Municipal Waste Combustion (MWC) units. Small MWC units are MWC units with capacities to combust greater than 35 tons per day (tpd) and less than 250 tons per day (tpd) of municipal solid waste. The Emission Guidelines contain monitoring, reporting, and record-keeping requirements that are to be included in state plans. If a State/Local Agency does not develop, adopt, and submit an approvable State plan, then facilities in that state are subject to the Federal Plan (Federal Plan Requirements for Small Municipal Waste Combustion Units Constructed On or Before August 30, 1999 (40 CFR part 62, subpart JJJ)), adopted on January 31, 2003. The Federal Plan implements the emission guidelines in jurisdictions that have not developed an approved State Plan. These regulations do not directly apply to small MWC unit owners and operators. However, MWC unit owners and operators must comply with either the State or Federal plans to implement the emission guidelines contained in this Subpart. This ICR identifies the burden to both respondents (owners or operators of small MWC units) and the Designated Administrator (either state/local agencies or the Federal government) to implement the emission guidelines imposed by the State plans. This information is being collected to assure compliance with 40 CFR part 60, subpart BBBB.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of existing small MWC units.

Respondent's obligation to respond: Mandatory (40 CFR 60, subpart BBBB).

Estimated number of respondents: 22 (total).

Frequency of response: Semiannually, annually.

Total estimated burden: Respondent burden is 86,500 hours (per year). State/

local agency burden for administering the rule is 770 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: Respondent cost is \$6,130,000 (per year). This includes \$422,000 in annualized capital/startup and/or operation & maintenance costs. State/local agency cost is \$39,000 per year.

Changes in the Estimates: There is a decrease in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens due to an adjustment in the number of respondents subject to the requirements of Subpart BBBB, which have decreased. This ICR also adjusts the burden to reflect those requirements of Subpart BBBB that are implemented under State plans or a Federal Plan, to incorporate the burden associated with the Federal Plan. The Federal Plan was finalized at 40 CFR part 62, subpart JJJ on January 31, 2003 (68 FR 5158). As of August 20, 2021, EPA data and the listing of approved State plans in the e-CFR indicates that 7 State and local agencies enforce the State plans or have requested and received delegation of enforcement of the Federal Plan. The remainder of the small MWC units will be covered by the Federal Plan, where EPA is the implementing agency. The burden on State and local agencies is included in respondent burden in this ICR, and is similar to the Agency burden in the previous ICR.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–ORD–2015–0765; FRL–9852–01–ORD]

Request for Public Nominations of Experts To Review the New Chemicals Collaborative Research Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is seeking nominations for technical experts to serve as Special Government Employees (SGEs) to participate in the review of the New Chemicals Collaborative Research Program with the Board of Scientific Counselors (BOSC), a federal advisory committee to the Office of Research and Development (ORD). Submission of

nominations will be made via the BOSC website at: <https://www.epa.gov/bosc>.

DATES: Nominations should be submitted by June 30, 2022, per instructions below.

FOR FURTHER INFORMATION CONTACT: Any member of the public needing additional information regarding this Notice and Request for Nominations may contact Mr. Tom Tracy, Office of Science Policy, Office of Research and Development, Mail Code B343-01, 109 T.W. Alexander Drive, Research Triangle Park, NC 27711; via phone/voice mail at: (919) 541-4334; or via email at: tracy.tom@epa.gov. General information concerning the BOSC can be found at the following website: <https://www.epa.gov/bosc>.

SUPPLEMENTARY INFORMATION:

Background

The BOSC is a chartered Federal Advisory Committee established by the EPA to provide independent scientific and technical peer review, advice, consultation, and recommendations about ORD. As a Federal Advisory Committee, the BOSC conducts business in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2) and related regulations.

The BOSC is comprised of an Executive Committee and two supporting subcommittee(s): Social and Community Science, and Climate Change. Please visit <https://www.epa.gov/aboutepa/about-office-research-and-development-ord> to learn more about ORD's research programs.

Members of the BOSC constitute a distinguished body of non-EPA scientists, engineers, and economists who are experts in their respective fields. We are seeking SGEs to serve as special experts to assist the BOSC in the review of the New Chemicals Collaborative Research Program in the Fall of 2022.

The BOSC will be evaluating the Office of Research and Development (ORD)'s draft Strategic Research Action Plans Fiscal Years 2023–2026 in Fall 2022. The Fall 2022 meeting will provide a more in-depth evaluation of the Toxic Substances Control Act (TSCA) New Chemicals Collaborative Research Program (See Output CSS.8.4: Innovative science to support new chemicals evaluation in the draft StRAP for Chemical Safety and Sustainability) and associated research plan (<https://www.regulations.gov/document/EPA-HQ-OPPT-2022-0218-0004>). An additional draft document will be provided that summarizes technical details of the research plan. ORD in partnership with the Office of Chemical

Safety and Pollution Prevention (OCSPP) are proposing to develop and implement a multi-year collaborative research program focused on approaches for performing risk assessments on new chemical substances under TSCA. The results of the effort are expected to bring innovative science to new chemical reviews, modernize the approaches used, and increase the transparency of the information underpinning the human health and ecological risk assessment process. Key areas proposed in the TSCA New Chemicals Collaborative Research Program include:

- Updating OCSPP's category and read-across approach which uses data from structurally similar chemicals to determine potential risks from new chemicals when data for those chemicals are lacking. This research effort will increase the efficiency of new chemical reviews by identifying appropriate analogues for read across and promoting the use of the best available data to protect human health and the environment. The existing category approach in use dates to 2010 and is available here: <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/chemical-categories-used-review-new>.

- Digitizing and consolidating information on chemicals to include data and studies that currently only exist in hard copy or in disparate TSCA databases. The information will be combined with publicly available sources to expand the amount of information available, enhancing chemical reviews and enabling efficient sharing of chemical information across EPA. Safeguards for TSCA confidential business information will be maintained as appropriate in this process. Data curation in public databases will proceed and where possible these databases will be made interchangeable with International Uniform Chemical Information Database (IUCLID) formats.

- Updating and augmenting the models used for predicting a chemical's physical-chemical properties and environmental fate/transport, hazard, exposure (including functional use predictions), and toxicokinetics to provide a suite of models to be used for new chemicals assessments. The goal of this effort is to update the models to reflect the best available science, increase transparency, and establish a process for updating these models as science evolves. The predictive models currently in use by OCSPP for new chemical evaluation are available here: <https://www.epa.gov/tsca-screening-tools>.

- Exploring ways to integrate and apply new approach methods (NAMs) in new chemicals assessments, thereby reducing the use of animal testing. As this effort evolves, the goal is to develop a suite of accepted, fit-for-purpose NAMs that could be used by external stakeholders for data submissions under TSCA as well as informing and expanding new chemical categories.

- Developing a decision support tool that integrates the various information streams specifically used for new chemical risk assessments. The decision support tool will more efficiently integrate all the data streams (e.g., chemistry, fate, exposures, hazards) into a final risk assessment and transparently document the decisions and assumptions made. Simply put, this will facilitate the tracking of the new chemicals program decisions and provide consistency within and across chemistries.

EPA will consider nominees from industry, business, public and private research institutes or organizations, academia, government (federal, state, local, and tribal) and non-government organizations, and other relevant interest areas. EPA values and welcomes diversity. All qualified candidates are encouraged to apply regardless of gender, race, disability, or ethnicity.

Expertise Sought

The EPA invites nominations of individuals to serve as SGEs with expertise or extensive experience in the following scientific disciplines and topic areas as they relate to human health and the environment:

- Using data to develop predictive models and use of predictive models in data poor environment
 - Read across and analogue selection
 - Chemical structures and cheminformatics
 - Quantitative Structure-Activity Relationships (QSAR)
- Development, implementation, and validation of new approach methods (NAMs). Relevant expertise may include:
 - Veterinary pathology or comparative physiology for perspective on relevance of laboratory animals for predicting human outcomes
 - Reference data curation to support validation
- Computational modeling, bioinformatics, and/or statistics
- Toxicokinetics, Physiologically-based pharmacokinetic models (PBPK), and in vitro to in vivo extrapolation (IVIVE)
- Systems biology
- Human health and ecological risk assessment

Exposure modeling and/or assessment, including near-field and far-field sources

- Knowledge of TSCA
- Environmental fate of chemicals

Selection Criteria

Nominations will be evaluated on the basis of several criteria including: (a) Demonstrated scientific and/or technical credentials and disciplinary expertise, knowledge, and experience in relevant fields; (b) availability to serve and willingness to commit time to the committee (approximately one to three meetings per year both by teleconferences and possibly face-to-face meetings); (c) absence of financial conflicts of interest; (d) absence of an appearance of a lack of impartiality; (e) demonstrated ability to work constructively and effectively on committees; and (f) background and experiences that would contribute to the diversity of viewpoints including workforce sector, geographical location, social, cultural, and educational backgrounds, and professional affiliations.

Process and Deadline for Submitting Nominations

Any interested person or organization may nominate qualified persons to be considered for appointment. Nominations should be submitted via the BOSC website at: <https://www.epa.gov/bosc>. Nominations should be submitted no later than June 30, 2022. To receive full consideration, nominations should include all the information requested. EPA's nomination form requests: Contact information about the person making the nomination; contact information about the nominee; the disciplinary and specific areas of expertise of the nominee; the nominee's curriculum vita and/or resume; and additional information that would be useful for considering the nomination such as background and qualifications (e.g., current position, educational background, expertise, research areas), experience relevant to the areas mentioned above, service on other advisory committees and professional societies, and availability to participate as an SGE. Persons having questions about the nomination procedures, or who are unable to submit nominations through the BOSC website, should contact Mr. Tom Tracy, as indicated

above under **FOR FURTHER INFORMATION CONTACT** section of this notice.

Mary Ross,

Director, Office of Science Advisor, Policy and Engagement.

EXPORT-IMPORT BANK

[Public Notice: 2022–6011]

Agency Information Collection Activities: Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995. This collection of information is necessary to determine eligibility of the export sales for insurance coverage. The

Report of Premiums Payable for Financial Institutions Only is used to determine the eligibility of the shipment(s) and to calculate the premium due to EXIM for its support of the shipment(s) under its insurance program. Export-Import Bank customers will be able to submit this form on paper or electronically.

DATES: Comments must be received on or before July 26, 2022 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on WWW.REGULATIONS.GOV (EIB 92–30) or by mail to Office of Information and Regulatory Affairs, 725 17th Street NW, Washington, DC 20038, Attn: OMB 3048–0021. The information collection tool can be reviewed at: <https://img.exim.gov/s3fs-public/pub/pending/EIB%2092-30%20Report%20of%20Premiums%20Payable%20for%20Financial%20Institutions%20Only%20-%202022%20draft.pdf>.

SUPPLEMENTARY INFORMATION:

Title and Form Number: EIB 92–30 Report of Premiums Payable for Financial Institutions Only.

OMB Number: 3048–0021.

Type of Review: Renewal.

Need and Use: This collection of information is necessary to determine eligibility of the applicant for EXIM assistance. The information collected enables EXIM to determine the eligibility of the shipment(s) for insurance and to calculate the premium due to EXIM for its support of the shipment(s) under its insurance program.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 215.

Estimated Time per Respondent: 30 minutes.

Annual Burden Hours: 1,290 hours.

Frequency of Reporting of Use: Monthly.

Government Expenses:

Reviewing Time per Year: 860 hours.

Average Wages per Hour: \$42.50.

Average Cost per Year: \$36,550 (time * wages).

Benefits and Overhead: 20%.

Total Government Cost: \$43,860.

Bassam Doughman,
IT Specialist.
