

the MCC Candidate Country Reform Act to select from the additional group of countries newly included for consideration for MCC assistance. The new authority aligns the income threshold for a country to be an MCC candidate country with the World Bank threshold for initiating the International Bank for Reconstruction and Development graduation process (\$7,895 gross national income per capita for fiscal year 2025). In considering any such new countries in MCC's candidate pool, the Board will continue to apply MCC's long-standing statutorily mandated eligibility criteria and selectivity model to all selections and will continue to prioritize the opportunity to reduce poverty through economic growth.

Country Newly Selected for Compact Assistance

Using the criteria described above, *Albania*, a candidate country under section 606(a) of the Act (22 U.S.C. 7705(a)), was newly selected as eligible for assistance under section 607 of the Act (22 U.S.C. 7706). Albania is invited by MCC to develop a compact.

Albania: A prior MCC threshold program partner, Albania performs well on the scorecard, passing 15 of 20 indicators overall. A stable democracy with a record of competitive elections, Albania is expected to hold parliamentary elections on May 11, 2025. In recent years, Albania has adopted critical anti-corruption and rule of law reforms amid efforts to join the European Union, which are reflected in its performance on the scorecard. Despite sound economic governance, Albania continues to face headwinds in its development path given its vulnerabilities to geopolitical and natural disaster-related shocks, which have disproportionately affected the poor in recent years; 14 percent of the population lives on less than \$6.85 per day—the World Bank's poverty line for upper middle-income countries. MCC's Board selected Albania as eligible to develop a compact in recognition of Albania's democratic history, progress fighting corruption, and ongoing development needs.
