

VI. Provisions for Disposition of Existing Stocks

Cancellation of manufacturing-use product registrations was effective on October 4, 2006. Cancellation of end-use product registrations will be effective on July 1, 2007. Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. It would be a violation of FIFRA to distribute or sell any stocks currently in the United States which have been produced, packaged, labeled, or released for shipment after the effective dates of cancellation listed in this document.

Existing stocks of the canceled products may be legally distributed or sold until the last date on which the product can be used, as specified in the cancellation orders, provided that use of existing stocks is consistent with the terms of the previously approved labeling on, or that accompanies, the modified product. For manufacturing-use products, the Agency has established in the cancellation orders July 1, 2007, as the last day on which existing stocks of these products can be used. For end-use products, the Agency expects that existing stocks will be exhausted by October 1, 2009, and, as such, has established in the cancellation orders October 1, 2009, as the last day on which existing stocks of these products can be used.
