SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information*: FERC-515 "Hydropower License-Declaration of Intention".

2. *Sponsor*: Federal Energy Regulatory Commission.

3. *Control No.*: OMB No. 1902-0079. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, with no changes to the existing collection. There is no change to the reporting burden. These are mandatory collection requirements.

4. *Necessity of Collection of Information*: Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the provisions of the Federal Power Act (FPA). The information reported under Commission identifier FERC-515 is filed in accordance with sections 23(b) of the FPA. Section 23(b) of the FPA authorizes the Commission to make a determination as to whether it has jurisdiction over a proposed hydroelectric project. Section 23(b) also requires that any person intending to construct project works on a navigable commerce clause water must file a declaration of their intention to do so with the Commission. If the Commission finds the proposed project will have an impact on "interstate or foreign commerce", then the person intending to construct the project must obtain a Commission license or exemption before starting construction. Such sites are generally on streams defined as U.S. navigation waters, and over which the Commission has jurisdiction under its authority to regulate foreign and interstate commerce. The information is collected in the form of a written application, declaring the applicant's intent and used by Commission staff to research the jurisdictional aspects of the project. This research includes examining maps and land ownership records to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdiction by the Commission eliminates a substantial paperwork burden for an applicant who might otherwise have to file a license or exemption application.

5. *Respondent Description*: The respondent universe currently comprises on average, 10 applicants for a declaration of intention ("DI").

6. *Estimated Burden*: 800 total burden hours, 10 respondents, 1 response annually, 80 hours per response (average).

7. *Estimated Cost Burden to Respondents*: 800 hours ÷ 2,080 hours per year × \$117,041 per year = \$45,016, average cost per respondent = \$4,502.

Statutory Authority: Sections 23(b), of the Federal Power Act (FPA), 16 U.S.C. Section 617.

Secretary.

SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information*: FERC-511 "Application for Transfer of License".

2. *Sponsor*: Federal Energy Regulatory Commission.

3. *Control No.*: OMB No. 1902-0069. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, with no changes to the existing collection. There is a change to the reporting burden which is the result of an increase in the number of entities who have filed applications to transfer their licenses due to restructuring within the industry. This change has been indicated as an adjustment to the reporting burden. These are mandatory collection requirements.

4. *Necessity of Collection of Information*: Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the provisions of the Federal Power Act (FPA). The information reported under Commission identifier FERC-511 is filed in accordance with sections 4(e) and 8 of the FPA. Section 4(e) of the FPA authorizes the Commission to issue licenses for construction, operation and maintenance of dams, water conduits, reservoirs, and transmission lines or other facilities necessary for the development, transmission and utilization of power from bodies of water Congress has jurisdiction over. Section 8 of the FPA provides that the voluntary transfer of any license can only be made with the written approval of the Commission. Any successor to the licensee may assign the rights of the original licensee, but is subject to all of the conditions of the license. The information is collected in the form of a written application for transfer of a license, executed jointly by the parties to the proposed transfer. It is used by the Commission staff to determine the qualifications of the proposed transferee to hold the license, and to prepare the transfer of the license order.

5. *Respondent Description*: The respondent universe currently comprises on average, 40 applicants for transfer of a hydro electric license.

6. *Estimated Burden*: 1,600 total burden hours, 40 respondents, 1
