SUPPLEMENTARY INFORMATION:

Background

Atlantic Coast Port Access Route Study

On April 5, 2017, the Coast Guard announced the completion of the Atlantic Coast Port Access Route Study in the **Federal Register** (82 FR 16510), which is available for viewing and download from the Coast Guard Navigation Center's website at <https://www.navcen.uscg.gov/port-access-route-studies>.

The ACPARS identified navigation safety corridors along the Atlantic Coast based on the predominant two-way vessel traffic and customary routes confirmed with AIS data for offshore deep draft and coastal seagoing tug/tow vessels. The study recommended using these corridor locations to establish shipping safety fairways or other appropriate vessel routing measures.

Based on the recommendations provided in the ACPARS, the Coast Guard published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (85 FR 37034) on June 19, 2020. This ANPRM, which is available for viewing and download from the **Federal Register** docket USCG–2019–0279 at www.regulations.gov, sought comments regarding the possible establishment of fairways along the Atlantic Coast of the United States, as identified in the ACPARS final report.

Port Approaches and International Entry and Departure Transit Areas

Recognizing the ACPARS only analyzed coastal, longshore, and predominantly north/south vessel transit routes along the Atlantic Coast, the Coast Guard announced on March 15, 2019, new studies focused on port approaches and international entry and departure areas along the Atlantic Coast to supplement the ACPARS. On September 9, 2022, the Coast Guard announced the availability of the Consolidated Port Approaches and International Entry and Departure Transit Areas Port Access Route Studies, (CPAPARS). The CPAPARS summarizes the findings of four regional port access route studies: the Northern New York Bight; Seacoast of New Jersey Including Offshore Approaches to the
