

disparately impose requirements on similarly situated members.

In addition, the proposed amendments to require a member inter-dealer quotation system to establish, maintain and enforce fair and reasonable written policies and procedures relating to the collection and dissemination of quotations in OTC equity securities are important to facilitate an orderly environment around quotation activity in OTC equity securities. Furthermore, the proposal provides for a “policies and procedures” approach and, therefore, affords all members within its scope a degree of flexibility in implementing measures to comply with the proposed rule.

FINRA also does not believe that the proposed requirement that members provide copies of the aforementioned written policies, procedures and standards (and material updates, modifications and revisions thereto) results in an unwarranted burden on competition because the member inter-dealer quotation system would be permitted to proceed with the implementation of desired changes to its written policies, procedures and standards, as long as it notifies FINRA within five business days following the implementation of the changes.

The proposal requiring a member inter-dealer quotation system to provide FINRA with a written description of each quotation-related data product offered by such member and related pricing information, including fees, rebates, discounts and cross-product pricing incentives (and any changes thereto) within five business days is essential to FINRA’s ongoing monitoring of the widespread availability of quotation information on OTC equity securities. FINRA also does not believe that this requirement imposes an unwarranted burden on competition because the proposed rule would permit the member inter-dealer quotation system to launch a new quotation-related data product or related price (or change an existing data product or related price) without delay, followed by timely notification to FINRA. This proposed amendment would apply to all members meeting the Rule 6420 definition of “inter-dealer quotation system,” and therefore would not disparately impose requirements on similarly situated members.

The proposed clarification and streamlining of the quotation recording and reporting requirements are minor and generally consistent with current practice; therefore, FINRA anticipates that members would need to make very few changes to comply with the revised

regime. Thus, any burden associated with the rule change is negligible and its impact on competition nonexistent. Finally, FINRA does not believe that the proposed deletion of the OTCBB-related rules and the discontinuance of the operation of the Service would impose any burden on competition because the Service currently operates as a transparency utility and, therefore, its closure would not burden competition and in no way would hinder the ability of new competitors to enter the market.
