The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The licensee requests approval of a temporary variance of its requirements to provide sediment flushing flows pursuant to Condition 13 of the project water quality certification. The intent of the requirement was to control nuisance aquatic vegetation and impede mosquito reproduction in Fall River Pond. The flows are required to be released during one weekend each, in May or June, July, and August. However, the U.S. Fish and Wildlife Service determined in 2009 that the flows adversely affect the federally-endangered Shasta crayfish (*Pacifastacus fortis*) and its habitat. The licensee's Flushing Flow Effectiveness Monitoring Plan results have also shown that minimum instream flows have been more effective at suppressing and maintaining consistently low surface aquatic vegetation than flushing flows. As such, the licensee is requesting that no flushing flows be required in 2022.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document.
