

been included on New Jersey's list due to impairment by toxic pollutants, but were inadvertently omitted.

Subsequently, during the course of the litigation, EPA determined that a sixth water, the Singac River had also been inadvertently omitted from New Jersey's 303(d) list. More specifically, while the Lower Passaic River, reach number 02030103-012-125/ at Singac, is listed in the State's 1998 303(d) list at page A 9 for fecal coliform and phosphorus, the Singac River, reach number 02030103, is not listed for whole effluent toxicity, despite the fact that New Jersey had previously determined it that was impaired due to violations of whole effluent toxicity requirements.

In preparing its 1998 CWA Section 303(d) list, New Jersey relied upon several sources of information, including the EPA approved CWA Section 304(l) lists. Under CWA Section 304(l), states were required to submit to EPA several lists, including, pursuant to

Section 304(l)(A)(i)—a list of water bodies the state does not expect to achieve State water quality standards due to discharges of toxic pollutants from point or nonpoint sources (the "mini list"). In 1993, EPA approved New Jersey's CWA Section 304(l) lists. A notice announcing EPA's final approval of New Jersey's 304(l) lists, including New Jersey's mini list, was published in the **Federal Register** on November 2, 1993 (58 FR 58548).

The six waters that EPA is proposing to add originate from New Jersey's CWA Section 304(l) mini list. With the exception of these six waters, the remaining waters listed under the CWA Section 304(l) mini list were included in New Jersey's 1998 CWA Section 303(d) list.

Five of the six waters: Ackerman's Creek, Berry's Creek, Birch Swamp Brook, Capoolony Creek, and Edmund's Creek were found to be potentially impaired due to contamination from

adjacent hazardous waste sites listed under the National Priority List. The Singac River was identified by New Jersey as requiring additional water-quality based controls for whole effluent toxicity.

## II. Proposed Action

EPA is proposing to disapprove New Jersey's omission of six waters from its 1998 CWA Section 303(d) list. EPA is proposing to add the six waters (shown in Table 1) to New Jersey's 1998 Section 303(d) list. Consistent with EPA's regulations, 40 CFR part 130.7(b)(4), the pollutants potentially causing impairments of the listed waters are identified in Table 1. The toxic pollutants identified for the listed waters (with the exception of the Singac River) are based on data collected at the adjacent hazardous waste sites. For the Singac River, specific toxic pollutants have yet to be identified.

TABLE 1.—LIST OF SIX WATERS PROPOSED FOR ADDITION TO NEW JERSEY'S 1998 CWA SECTION 303(D) LIST

Waterbody	Reach No.	Pollutant(s)
Ackerman's Creek .....	02030103	Chromium, mercury, PCBs, chlorinated benzenes.
Berry's Creek .....	02030103034	mercury, other metals.
Birch Swamp Creek .....	02030104	arsenic, lead, copper, zinc, PCBs.
Capoolony Creek .....	02030105	DDT.
Edmund's Creek .....	02030105	PCBs.
Singac River .....	02030103	Whole Effluent Toxicity.

CWA Section 303(d)(1) and EPA's regulations at 40 CFR 130.7(b)(4) require States to prioritize waters on their Section 303(d) lists for TMDL development. EPA is proposing that a ranking of low priority be assigned to the six waters. A low priority is appropriate because of the control actions that are currently underway for the five waterbodies (Ackerman's Creek, Berry's Creek, Birch Swamp Brook, Capoolony Creek, Edmund's Creek) that have been listed due to potential contamination from adjacent hazardous waste sites. These waters should be restored upon implementation of the remediation plans for the sites impacting the waters. EPA believes that any TMDL that is developed for these waters will rely on the remediation plans, required under 40 CFR § 300.430 for the hazardous waste sites. EPA expects that New Jersey will track the progress of remediation plans for the relevant hazardous sites and the water quality of the above five waters. In the case of the Singac River, the original listing under CWA Section 304(l) was not specific and there is some uncertainty as to the specific toxic pollutants and the degree of

impairment. EPA recommends that New Jersey review and evaluate existing and readily available data and information regarding the presence of toxic pollutants in the Singac River to determine the specific toxic pollutants and degree of impairment.

EPA is soliciting public comment on the proposed addition and priority ranking of Ackerman's Creek, Berry's Creek, Birch Swamp Creek, Capoolony Creek, Edmund's Creek, and the Singac River to New Jersey's 1998 CWA Section 303(d) list.

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.
