Proposed Project: OAT Telehealth Outcome Measures Development and Analysis: New

The Office for the Advancement of Telehealth (OAT) has created a set of

performance measures that grantees can use to evaluate the effectiveness of their services programs and monitor their progress through the use of performance reporting data. As required by the Government Performance and Review Act of 1993 (GPRA), all Federal agencies must develop strategic plans describing their overall goal and objectives. The Office for the Advancement of Telehealth (OAT) has worked with its grantees to develop performance measures to be used to evaluate and monitor the progress of the grantees. Grantee goals are to: Improve access to needed services; reduce rural practitioner isolation; improve health system productivity and efficiency; and improve patient outcomes. In each of these categories, specific indicators were designed to be reported through a performance monitoring Web site.

The Program Assessment Response Tool (PART) is the newest instrument created for use by Federal agencies. The Office of Management and Budget (OMB) uses the PART to assess Federal programs. The PART is a series of diagnostic questions used to assess and evaluate programs across a set of performance-related criteria, including program design and purpose, strategic planning, program management, and results. PART results are used to inform the budget process and improve program management. OAT's Telehealth Network Grant Program has been undergoing a PART assessment this year. Thus, in addition to responding to the GPRA initiative, OAT now has the added responsibility of responding to the PART assessment of its Telehealth Network Grant Program. The proposed performance measures will provide performance data that will address the PART assessment, monitor progress, and evaluate program effectiveness.

The estimates of burden are as follows:

Form	Number of respondents	Responses per respondent	Total responses	Hour burden	Total burden hours
Performance Measurement Tool	667	2	1,334	7	9,338
