

- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255 (August 10, 1999));
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885 (April 23, 1997));
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355 (May 22, 2001));
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629 (February 16, 1994)).

In addition, this proposed action does not have tribal implications as specified by Executive Order 13175 (65 FR 67249 (November 9, 2000)), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

SUPPLEMENTARY INFORMATION: The Public Safety and Homeland Security Bureau of the Federal Communications Commission provides seven days for public comment on matters raised by the First Responder Network Authority (FirstNet) in its August 2, 2013, filing in PS Docket 12-94.¹ FirstNet's filing responds to a *Notice of Proposed Rulemaking (NPRM)* that seeks comment on, among other matters, the consolidation into Part 90 of technical service rules for the 758-769 and 788-799 MHz bands, which, heretofore, have been subject to regulation under both

Parts 27 and 90.² The rules at issue include power, emission, and field strength limits and interference coordination procedures designed to prevent interference to operations of other Commission licensees. This proposed rule consolidation is intended to "facilitate the transition" of spectrum to the First Responder Network Authority (FirstNet), the entity licensed to establish a nationwide public safety broadband network using both the public safety broadband spectrum (763-768/793-798 MHz) and the adjacent "D Block" (758-763/788-793 MHz) previously slated for commercial auction.³ In proposing this rule consolidation, the Commission further directed its Office of Engineering and Technology (OET) to suspend its acceptance and processing of applications for equipment authorization in these bands pending the adoption of technical service rules applicable to the combined band.⁴

In its filing, FirstNet supports "consolidating the technical requirements for the former D Block into Part 90 of the Commission's Rules" and recommends that the Commission "act quickly to amend its technical service rules to enable FirstNet to expedite the deployment of" its network."⁵ Additionally, FirstNet urges "swift Commission action to begin accepting and processing equipment authorizations in the newly combined spectrum," citing "an imminent need for authorized equipment to meet the needs of jurisdictions that may deploy early" in FirstNet's licensed spectrum under spectrum leases. FirstNet has already entered lease agreements with the Los Angeles Regional Interoperable Communications System (LA-RICS) and the State of New Mexico, and it has stated its intention to execute similar agreements with other public safety jurisdictions in the near future.⁶ While

The comment cycle closed on June 10, 2013.

³ See *id.* at 2716, 2721 ¶¶ 2, 17; see also 47 U.S.C. 1424 (2012) (establishing FirstNet). FirstNet's license also includes the 768-769/798-799 MHz band, *id.* 1401(14), 1421(a), which is currently designated under Commission rules as a guard band separating the broadband and narrowband segments of the 700 MHz public safety spectrum. See 47 CFR 90.531(f).

¹ The Bureau takes this action pursuant to its delegated authority. See 47 CFR 0.392. As noted elsewhere herein, the short time frame provided by this notice is warranted in light of the pressing need recognized by FirstNet and other commenters for expedition on reinitiating the currently suspended equipment authorization process. Moreover, this notice follows a full *NPRM* comment period. Accordingly, parties should submit any new arguments now in order to facilitate prompt action by the Commission.

FirstNet supports Commission action to “expedite a process” for equipment authorization to support these early deployments, it cautions that “the equipment market will need to evolve once the architecture for the nationwide public safety broadband network has been set.”⁷
