AGENCY: Defense Acquisition Regulations System; Department of Defense (DoD).

ACTION: Notice and request for comments regarding a proposed extension of an approved information collection requirement.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, DoD

announces the proposed extension of a public information collection requirement and seeks public comment on the provisions thereof. DoD invites comments on: whether the proposed collection of information is necessary for the proper performance of the functions of DoD, including whether the information will have practical utility; the accuracy of the estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. The Office of Management and Budget (OMB) has approved this information collection for use under Control Number 0750-0002 through September 30, 2023. Needs and Uses: The collection of information is necessary to protect against foreign interference with DoD telecommunications, which could jeopardize our military communications, the lives of our warfighters, and our national security. The collection of information is

essential to the mission of the agencies to ensure DoD does not purchase prohibited equipment, systems, and services, and can respond appropriately if any such purchases are not identified until after delivery or use.

This requirement supports implementation of section 1656(b) of the National Defense Authorization Act for Fiscal Year 2018. Section 1656 prohibits DoD from procuring or obtaining, or extending or renewing a contract to procure or obtain, any equipment, system, or service to carry out the nuclear deterrence mission and homeland defense mission that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as a part of any system.

- DFARS 252.204-7018 requires contractors to report covered telecommunications equipment, systems, and services identified during performance of a contract.

[Docket No. CP23-214-000]

Columbia Gas Transmission, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Greenwood and North Greenwood Storage Fields Abandonment Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document, that will discuss the environmental impacts of

the Greenwood and North Greenwood Storage Fields Abandonment Project involving abandonment of facilities by Columbia Gas Transmission, LLC (Columbia) in Steuben County, New York. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as “scoping.” The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission’s NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on April 21, 2023, you will need to file those comments in Docket No. CP23-214-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission’s current environmental mailing list for this project. State and local government representatives should

notify their constituents of this proposed project and encourage them to comment on their areas of concern.

Columbia provided landowners with a fact sheet prepared by the FERC entitled “An Interstate Natural Gas Facility On My Land? What Do I Need To Know?” which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission’s proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (www.ferc.gov) under the Natural Gas, Landowner Topics link.
