Georgia: Final Authorization of State Hazardous Waste Management Program Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Georgia has applied to EPA for Final authorization of the changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA proposes to grant final authorization to Georgia. In the "Rules and Regulations" section of this **Federal Register**, EPA is authorizing the changes by an immediate final rule. EPA did not make a proposal prior to the immediate final rule because we believe this action is not controversial and do not expect comments that oppose it. We have explained the reasons for this authorization in the preamble to the immediate final rule. Unless we get written comments which oppose this authorization during the comment period, the immediate final rule will become effective on the date it establishes, and we will not take further action on this proposal. If we get comments that oppose this action, we will withdraw the immediate final rule and it will not take effect. We will then respond to public comments in a later final rule based on this proposal. You may not have another opportunity for comment. If you want to comment on this action, you must do so at this time.

DATES: Send your written comments by December 19, 2002.

ADDRESSES: Send written comments to Narindar Kumar, Chief, RCRA Programs Branch, Waste Management Division, U.S. Environmental Protection Agency, The Sam Nunn Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303-8960; (404) 562-8440. You can examine copies of the materials submitted by Georgia during normal business hours at the following locations: EPA Region 4 Library, The Sam Nunn Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303-8960, Phone number: (404) 562-8190, Kathy Piselli, Librarian; or The Georgia Department of Natural Resources Environmental Protection Division, 205 Butler Street, Suite 1154, East, Atlanta Georgia 30334-4910, Phone number: 404-656-7802.

Endangered and Threatened Wildlife and Plants; 12-Month Finding on a Petition To List Bocaccio as Threatened

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of petition finding and availability of a status review document.

SUMMARY: NMFS announces a 12-month finding on a petition to list the southern population of bocaccio (*Sebastes paucispinis*) as a threatened species and to designate critical habitat under the Endangered Species Act (ESA). Based on a review of the best scientific and commercial information on the status of the species, and on the recent actions adopted by the Pacific Fishery Management Council, NMFS finds that listing the southern population of bocaccio is not warranted at this time.

DATES: The finding announced in this document was made on November 14, 2002.

ADDRESSES: The bocaccio status review and accompanying stock assessment and rebuilding analysis are available electronically at the NMFS Web site at <http://www.nmfs.noaa.gov>. Paper copies of the status review and a list of references are available by submitting requests to Cathy Campbell, Protected Resources Division, NMFS, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213. The status review, along with the accompanying stock assessment and rebuilding analysis, are the basis for the following discussions, except where other references are noted.

SUPPLEMENTARY INFORMATION:

Background

On January 30, 2001, NMFS received a petition from the Natural Resources Defense Council, Center for Biological Diversity, and Center for Marine Conservation (now known as The Ocean Conservancy) to list the central/southern distinct population segment (DPS) of bocaccio (*Sebastes paucispinis*) or, in the alternative, to list bocaccio throughout its entire range as threatened under the ESA. The petition also requested that NMFS designate critical habitat for bocaccio. The petitioners contend that bocaccio have suffered precipitous population declines over the last several decades and that these population declines threaten bocaccio with extinction and compromise its ability to recover. The petitioners identified overutilization, specifically the direct and indirect harvest of bocaccio in groundfish fisheries, as the primary cause of bocaccio's decline. The petitioners identified other factors contributing to the status of bocaccio including inadequate regulatory mechanisms and habitat modification due to the effects of bottom trawling gear, pollution of nearshore juvenile habitat, and shifts in oceanographic conditions.

In reviewing the petition, NMFS also reviewed stock assessments, fishery independent and dependent data and other reports prepared prior to and from the time that bocaccio and other Pacific rockfish species came under Federal management. On June 14, 2001, NMFS published its determination (66 FR 32304) that the petition presented substantial scientific and commercial information indicating that listing may be warranted, and announced the initiation of a formal status review as required by section 4(b)(3)(A) of the ESA. To ensure a comprehensive review, NMFS concurrently solicited additional information and comment from the public on historical abundance, current abundance, factors contributing to population declines, sources of mortality, habitat use, habitat condition, factors affecting habitat condition, and distinctness of the southern population. In addition, NMFS solicited information regarding the adequacy of bocaccio conservation efforts and on areas that may qualify for critical habitat for bocaccio.

In response to the 90-day petition finding, NMFS received one public comment. The comment focused on the inadequacy of existing regulatory measures and, in particular, the underestimate of discards of bocaccio and the authorization of continued overfishing.
