SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau uses the Computer-Assisted Personal Interviewing (CAPI) electronic questionnaire SOC-QBPO to collect information from state and local building permit officials, such as (1) the types of permits they issue, (2) the length of time a permit is valid, (3) how they store permits, and (4) the geographic coverage of the permit system. We need this information to carry out the sampling for the Survey of Housing Starts, Sales, and Completions (OMB number 0607-0110), also known as Survey of Construction (SOC). The SOC provides widely used measures of construction activity, including the economic indicators Housing Starts, Housing Completions, and New Housing Sales.

We plan no changes to the information collection methodology. In addition, there are no plans to change the sample size.

II. Method of Collection

The Census Bureau uses its field representatives to obtain information on the operating procedures of a permit office. The field representative visits the permit office, conducts the interview, and completes the electronic form.

Type of Review: Regular review.

Affected Public: State and local governments.

Submission For OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Quarterly Survey of the Finances Of Public-Employee Retirement Systems.

Form Number(s): F-10.

Agency Approval Number: 0607-0143.

Type of Request: Revision of a currently approved collection.

Burden: 300 hours.

Number of Respondents: 100.

Avg Hours Per Response: 45 minutes.

Needs and Uses: The Census Bureau requests continued OMB clearance of the Quarterly Survey of the Finances of Public Employee Retirement Systems. Over 2.1 trillion dollars in public-employee retirement system assets in the financial markets are controlled by a small number of large systems. The 1997 Census of Governments identified 2,276 state and local government administered public-employee retirement systems. The 100 largest systems, as measured by the system assets, account for about 90 percent of the total assets of all systems. This survey is used to collect financial data from these 100 systems for policy makers and economists to follow the changing characteristics of these funds.

We are proposing significant revisions to the survey form to make the form easier to complete. These changes pertain to decreasing the number of data items for the respondent to complete from forty-one to nineteen and the use of market value of assets. Previously, data on market and book values was collected but in light of the fact that most retirement systems use market in keeping with General Accounting Board Standards (GASB) rules, book has been removed from form F-10.

This survey was initiated by the Census Bureau at the request of both the Council of Economic Advisors and the Federal Reserve Board. The most important information this survey provides is the quarterly change in composition of the securities holdings of the public employee retirement systems component of the economy. The Federal Reserve Board uses these data to track the public sector portion of the flow of funds accounts. The Bureau of Economic Analysis uses the quarterly retirement information on corporate
