

comparisons in future iterations. Information will be collected for calendar year 2013.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 300 respondents (tribal courts) will take part in the National Survey of Tribal Courts Systems 2013. Based on pilot testing an average of 2 hours each is needed to complete the form appropriate for the tribal system: NSTCS-13L48, NSTCS-13AK, or NSTCS-13CFR. The estimated range of burden for respondents is expected to be between 1.5 to 2.5 hours for completion. The following factors were considered when creating the burden estimate: the estimated total number of tribal courts, the ability of tribal courts to access or gather the data, and the information systems capabilities generally found within Indian country. BJS estimates that nearly all of the approximately 300 respondents will fully complete the questionnaire.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 600 hours. It is estimated that respondents will take 2 hours to complete a questionnaire. The burden hours for collecting respondent data sum to 600 hours (300 respondents \times 2 hours = 600 hours).
