

amendments into one ICR. This ICR also includes the burden associated with the 2016 amendments to the Final Rule (81 FR 6688, February 8, 2016), which added three materials to the list of categorical non-waste fuels: (1) construction and demolition (C&D) wood processed from construction and demolition debris according to best management practices; (2) paper recycling residuals (PRRs) generated from the recycling of recovered paper, paperboard and corrugated containers and combusted by paper recycling mills whose boilers are designed to burn solid fuel; and (3) creosote-treated railroad ties that are processed and combusted in units designed to burn both biomass and fuel oil as part of normal operations and not solely as part of start-up or shut-down operations. Finally, this ICR includes the burden associated with the 2018 amendments to the Final Rule (83 FR 5317, February 7, 2018), which added three types of other treated railroad ties (OTRTs) to the list of categorical non-waste fuels: (1) Creosote-borate treated railroad ties, and mixtures of creosote, borate and copper naphthenate treated railroad ties that are processed and combusted in units designed to burn both biomass and fuel oil; (2) Copper naphthenate treated railroad ties that are processed and then combusted in units designed to burn biomass, biomass and fuel oil or biomass and coal; and (3) Copper naphthenate-borate treated railroad ties that are processed and then combusted in units designed to burn biomass, biomass and fuel oil or biomass and coal.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. Abstract: EPA is collecting data from the states on their advancement toward substantial implementation of protection strategies for all community water systems (CWSs). EPA and states use this voluntary collection of data to track and understand the progress toward increasing the percentage of CWSs (and the populations they serve) where risk is minimized through source water protection. Source water protection data that states submit directly to the Source Water Protection Information System (SDWIS) is accessible to the public via EPA's website at: <https://www.epa.gov/ground-water-and-drinking-water/safe-drinking-water-information-system-sdwis-federal-reporting>. Availability of this information, together with source water and demographic indicators that are publicly available via EPA's Drinking Water Mapping Application to Protect Source Waters (DWMAPS) on EPA's website at: <https://www.epa.gov/sourcewaterprotection/drinking-water-mapping-application-protect-source-waters-dwmaps>, promote equity by empowering communities to include these considerations in their own analyses and outreach efforts.

Form Numbers: None.

Respondents/affected entities: 51.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 51 (total).

Frequency of response: Annual.

Total estimated burden: 288 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$17,074 (per year).

Changes in the estimates: EPA anticipates the annual totals for estimated burden and costs at 288 hours and \$17,074, respectively. There is an expected decrease of hours in the total estimated respondent burden compared to what was identified in the ICR currently approved by OMB due to voluntary reporting that would decrease in frequency from quarterly to annual reporting. State databases are fully developed and tracking is routine, which EPA believes will result in efficiencies that would allow states to minimize hourly burden and cost.

Director, Regulatory Support Division.

D. What is the Agency's authority for taking this action?

The Panel is a federal advisory committee, established in 1975 under FIFRA (7 U.S.C. 136 *et seq.*), that operates in accordance with requirements of the Federal Advisory Committee Act (FACA) (5 U.S.C. appendix 2). In accordance with FACA requirements, a Charter for the FIFRA SAP, dated October 17, 2020, provides for open meetings with opportunities for public participation.

II. Background

The FIFRA SAP serves as a scientific peer review mechanism of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide independent scientific advice, information, and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on health and the environment. The FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National Institutes of Health (NIH) and the National Science Foundation (NSF). Members serve staggered terms of appointment, generally of three to six years duration. FIFRA established a Science Review Board (SRB) consisting of at least 60 scientists who are available to the FIFRA SAP on an ad hoc basis to assist in reviews conducted by the FIFRA SAP.

As a scientific peer review mechanism, the FIFRA SAP provides comments, evaluations, and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of the FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendations to the Agency.

III. Nominees

A. Qualifications of Members
