II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Phlx proposes to amend Options 3, Options Trading Rules, at: Section 7, Types of Orders and Order and Quote Protocols; Section 8, Options Opening Process; Section 10, Electronic Execution Priority and Processing in the System; Section 12, Electronic Qualified Contingent Cross Order; Section 13, Price Improvement XL ("PIXL"); Section 14, Complex Orders; Section 23, Data Feeds and Trade Information; Option 5, Section 4, Order Routing; and Options 7, Section 3, Rebates and Fees for Adding and Removing Liquidity in SPY. The Exchange also proposes to amend its Rules at Options 8, Floor Trading, at: Section 30, Crossing, Facilitation and Solicited Orders; and Section 32, Types of Floor-Based (Non-System) Orders.

Background

Today, Phlx's All-or-None Orders are described in Options 7, Section 7(b)(5) as Limit Orders or Market Orders that are executed in their entirety or not at all. All-or-None Orders may only be submitted by a Public Customer.³ Phlx's All-or-None Orders rest on the order book as non-displayed orders. The Exchange does not disseminate bids or offers of All-or-None Orders to the Options Price Reporting Authority or

"OPRA" and Top of PHLX Options⁴ feed, however All-or-None Orders are displayed in the PHLX Orders⁵ and PHLX Depth of Book⁶ feed. Further, All-or-None Orders are executed in price-time priority among all Public Customer orders if the size contingency can be met. If an All-or-None Order contingency cannot be met, the All-or-None Order would be by-passed until such time as the contingency could be met.⁷

Proposal

At this time, the Exchange proposes to amend All-or-None Orders so that they may only be submitted by a Public Customer as an Immediate-or-Cancel Order. With this proposed change, All-or-None Orders would no longer rest on the order book. Upon entry, an All-or-None Order would be executed in its

⁴ Top of PHLX Options ("TOPO") is a direct data feed product that includes the Exchange's best bid and offer price, with aggregate size, based on displayable order and quoting interest on Phlx and last sale information for trades executed on Phlx. The data contained in the TOPO data feed is identical to the data simultaneously sent to the processor for the OPRA and subscribers of the data feed. The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only. See Options 3, Section 23(a)(1).

⁵ PHLX Orders is a real-time full Limit Order book data feed that provides pricing information for orders on the PHLX Order book for displayed order types and All-or-None Orders, as well as market participant capacity. PHLX Orders is currently provided as part of the TOPO Plus Orders data product. PHLX Orders provides real-time information to enable users to keep track of the single and complex order book(s). The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, leg information on complex strategies and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only. The feed also provides auction and exposure notifications and order imbalances on opening/reopening (size of matched contracts and size of the imbalance). See Options 3, Section 23(a)(2).

⁶ PHLX Depth of Market is a data product that provides: (i) order and quotation information for individual quotes and orders on the order book; (ii) last sale information for trades executed on Phlx; (iii) auction; and (iv) an Imbalance Message which includes the symbol, side of the market, size of matched contracts, size of the imbalance, and price of the affected series. The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only. The feed also provides order imbalances on opening/reopening (size of matched contracts and size of the imbalance) and exposure notifications, with market participant capacity. See Options 3, Section 23(a)(2).

⁷ Also of note, All-or-None Orders are non-routable and the Acceptable Trade Range protection in Options 3, Section 15(a) is not applied to All-or-None Orders. See Options 7, Section 7(b)(5).
