The Final GCD Reevaluation identifies that all emissions above the General Conformity applicability thresholds from construction of the Project are expected to occur in New York and New Jersey within the New Jersey-New York-Connecticut Interstate Air Quality Control Region. The Final GCD Reevaluation concludes that the Project would achieve conformity with the New York and New Jersey State Implementation Plans through the purchase of emission reduction credits of nitrogen oxides to offset Project emissions.

The Final GCD Reevaluation is only available in electronic format. It may be viewed and downloaded from the FERC's website (www.ferc.gov) using the eLibrary link. ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2025-0077; FRL-12476-06-OCSPP]

Certain New Chemicals or Significant New Uses; Statements of Findings—June 2025

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Toxic Substances Control Act (TSCA) requires EPA to publish in the **Federal Register** a statement of its findings after its review of certain TSCA submissions when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to premanufacture notices (PMNs), microbial commercial activity notices (MCANs), and significant new use notices (SNUNs) submitted to EPA under TSCA. This document presents statements of findings made by EPA on such submissions during the period from June 1, 2025 to June 30, 2025.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA-HQ-OPPT-2025-0077, is available online at <https://www.regulations.gov>. Additional information about dockets generally, along with instructions for visiting the

docket in-person, is available at <https://www.epa.gov/dockets>.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action provides information that is directed to the public in general.

B. What action is the Agency taking?

This document lists the statements of findings made by EPA after review of submissions under TSCA section 5(a) that certain new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. This document presents statements of findings made by EPA during the applicable period.

C. What is the Agency's authority for taking this action?

TSCA section 5(a)(3) requires EPA to review a submission under TSCA section 5(a) and make specific findings pertaining to whether the substance may present unreasonable risk of injury to health or the environment. Among those potential findings is that the chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment per TSCA Section 5(a)(3)(C).

TSCA section 5(g) requires EPA to publish in the **Federal Register** a statement of its findings after its review of a submission under TSCA section 5(a) when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to PMNs, MCANs, and SNUNs submitted to EPA under TSCA section 5.

Anyone who plans to manufacture (which includes import) a new chemical substance for a non-exempt commercial purpose and any manufacturer or processor wishing to engage in a use of a chemical substance designated by EPA as a significant new use must submit a notice to EPA at least 90 days before

commencing manufacture of the new chemical substance or before engaging in the significant new use.

The submitter of a notice to EPA for which EPA has made a finding of "not likely to present an unreasonable risk of injury to health or the environment" may commence manufacture of the chemical substance or manufacture or processing for the significant new use notwithstanding any remaining portion of the applicable review period.

II. Statements of Findings Under TSCA Section 5(a)(3)(C)

In this unit, EPA identifies the PMNs, MCANs and SNUNs for which EPA has made findings under TSCA section 5(a)(3)(C) that the new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. For the findings made during this period, the following list provides the EPA case number assigned to the TSCA section 5(a) submission and the chemical identity (generic name if the specific name is claimed as confidential).

- P-24-0110, Alkyl fatty acids, polymers with substituted heteropolycyclic, substituted carbomonocycle, carbomonocyclic dicarboxylic acid and trisubstituted alkyl, substituted alkyl alkenoate-blocked, polymers with substituted alkene, substituted bis alkylalkanenitrile-initiated heteromonocyclic alkenoate-substituted alkanolic acid-alkyl alkenoate polymer alkenoate, heteromonocyclic alkenoate, substituted alkyl alkenoate, alkyl alkenoate, alkyl alkenoate, alkenolic acid and substituted carbomonocycle, alkyl substituted alkyl alkanolate initiated, and substituted bis alkylalkanenitrile-initiated (Generic Name).

To access EPA's decision document describing the basis of the "not likely to present an unreasonable risk" finding made by EPA under TSCA section 5(a)(3)(C), lookup the specific case number at <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/determined-not-likely>.
