

388,534 acres of citrus for a maximum of 762,309 lbs. Additionally, the applicant proposes up to three applications of oxytetracycline hydrochloride at a rate of 0.27 lb. per acre on up to 388,534 acres of citrus, for a maximum use of 314,712 lbs. Applications are proposed statewide in citrus production areas.

This notice does not constitute a decision by EPA on the application itself. The regulations governing FIFRA section 18 allow publication of a notice of receipt of an application for a specific exemption if the Administrator determines that publication of a notice of receipt is appropriate. The application proposes use of three pesticides which are also used as human and animal antibiotic drugs, and therefore this notice provides an opportunity for public comment on the application.

The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemptions requested by the Florida Department of Agriculture and Consumer Services.

Abstract: The EPA’s diesel fuel regulations under 40 CFR part 80, subpart I, are applicable to highway (“motor vehicle” or “MV”) diesel fuel

and non-road, locomotive and marine diesel fuel (NRLM) and heating oil (HO). Most of the information collected under this ICR is used to evaluate compliance with the requirements of the regulations. Since virtually all MV diesel fuel was required to meet a 15 part per million (ppm) standard as of June 1, 2010, very little reporting related to MV diesel fuel remains. However, reporting related to NRLM and HO will continue throughout the course of this proposed ICR renewal. The activities associated with this ICR include: Registration (all parties have registered; updates to existing registrations are still possible); compliance reports (mostly covering NRLM and HO; updates to prior compliance reports for MV diesel are still possible); research and development (R&D) exemptions; generation and retention of quality assurance (QA) records; foreign refiner recordkeeping and reporting; placement of PTD codes (a typically automated process, to indicate the presence of dye in tax-exempt fuel and/or sulfur content). This ICR renewal contains provisions related to qualification of laboratories on performance-based test methods. Virtually all applications have already been received from laboratories and acted upon by EPA.

Form Numbers: EPA Forms 5900-351, 5900-333, 5900-352, 5900-323, 5900-324, 5900-325, 5900-326, 5900-327, 5900-328, 5900-329, 5900-350, and 420-B-14-066a.

Respondents/affected entities: Refiners, importers, testing labs.

Respondent’s obligation to respond: Mandatory (40 CFR part 80).

Estimated number of respondents: 5753 (total).

Frequency of response: Yearly and semiannually.

Total estimated burden: 11,078 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,118,878 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 7,872 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to the decreased number of reports required.

Acting Director, Collection Strategies Division.
