SUPPLEMENTARY INFORMATION:

Title: Modernization of Poultry Slaughter Inspection.

OMB Number: 0583–0156.

Expiration Date of Approval: 9/30/2017.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary as specified in the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*). This statute provides that FSIS is to protect the public by verifying that poultry products are safe, wholesome, not adulterated, and properly labeled and packaged.

FSIS is requesting a renewal of the approved information collection regarding poultry slaughter inspection. The approval for this information collection will expire on September 30, 2017. There are no changes to the existing information collection.

FSIS requires that all official poultry slaughter establishments, other than establishments that slaughter ratites, maintain as part of their HACCP plan, sanitation SOP, or other prerequisite program, written procedures addressing (1) the prevention throughout the entire slaughter and dressing operation, of contamination of carcasses and parts by enteric pathogens (*e.g.*, *Salmonella* and *Campylobacter*) and by fecal material, including microbial test results, and (2) the prevention of carcasses and parts contaminated by visible fecal material from entering the chiller. This information was previously collected under the FSIS information collection for Sanitation SOPs and Pathogen Reduction/HACCP (0583–0103). Each establishment operating under the New Poultry Inspection System (NPIS) is required to collect and maintain

additional information concerning poultry slaughter:

- As part of the HACCP system, written procedures to prevent carcasses afflicted with septicemia and toxemia from entering the chiller; and
- records that document that the products resulting from slaughter operations meet the definition of ready-to-cook poultry.

Additionally, each establishment operating under the NPIS also needs to submit on an annual basis an attestation to the management member of the local FSIS circuit safety committee stating that it maintains a program to monitor and document any work-related conditions of establishment workers.

FSIS has made the following estimates based upon an information collection assessment:

Estimate of Burden: FSIS estimates that it will take respondents an average of .125 hours to record results and maintain necessary documentation.

Respondents: Official poultry establishments.

Estimated No. of Respondents: 289.

Estimated No. of Annual Responses per Respondent: 5,291.3.

Estimated Total Annual Burden on Respondents: 19,204 hours.

Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence SW., 6065, South Building, Washington, DC 20250; (202)720–5627.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of FSIS's functions, including whether the information will have practical utility; (b) the accuracy of FSIS's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20253.

Responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS Web page located at: <http://www.fsis.usda.gov/federal-register>.

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is available on the FSIS Web page. Through the Web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: <http://www.fsis.usda.gov/subscribe>. Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to conduct the Survey of Income and Program Participation (SIPP) 2018 Panel in 4 waves beginning in February 2018. Wave 1 of the SIPP 2018 Panel will be conducted from February to May of 2018. Wave 2 is scheduled to be conducted from February to May of 2019. Wave 3 is scheduled to be conducted from February to May of 2020. Wave 4 is scheduled to be conducted from February to May of

2021. The SIPP is a household-based survey designed as a continuous series of national panels. The SIPP represents a primary source of information about annual and sub-annual dynamics of income, family and household content, movement into and out of government programs, and interactions of these topics in a single, unified database allowing for in-depth, informed analyses. Government domestic policy formulators depend heavily upon SIPP information concerning the distribution of income received either directly as money or indirectly as in-kind benefits and the effect of tax and transfer programs on that distribution. They also rely on data that provides improved and expanded information on the dynamics of income and the general economic and financial situation of the U.S. population, in the context of the household situation, which the SIPP has provided on a continuing basis since 1983. The SIPP has measured levels of economic well-being and permitted measurement of changes in these levels over time.

A portion of the 2018 SIPP Panel will use an Event History Calendar (EHC) that facilitates the collection of dates of events and spells of coverage. The EHC is a tool to assist the respondent's ability to recall events accurately over the one year reference period and provide increased data quality and inter-topic consistency for dates reported by respondents. The EHC is intended to help respondents recall information in a more natural "autobiographical" manner by using life events as triggers to recall other economic events. The EHC was previously used in the 2014 Panel. The content of the 2018 SIPP Panel will match that of the 2014 SIPP Panel very closely. As with the 2014 Panel, the 2018 Panel SIPP design does not contain freestanding topical modules; however, a portion of traditional SIPP topical module content is integrated into the 2018 SIPP Panel interview. Examples of this content include questions on medical expenses, child care, retirement and pension plan coverage, marital history, and adult and child well-being.

The 2018 SIPP Panel begins with a new "Wave 1" sample of survey respondents who were not interviewed in the previous 2014 SIPP Panel. The 2018 SIPP Panel Wave 1 will interview respondents about the previous calendar year, 2017, as the reference period and will proceed with annual interviewing going forward. The 2018 SIPP Panel will use the same interviewing method structure as in the 2014 Panel, in which adults (age 15 years and older) who move from the prior wave household
