Title: NSPS for Onshore Natural Gas Processing Plants (40 CFR Part 60, Subparts KKK and LLL) (Renewal)

Abstract: The New Source Performance Standards (NSPS) for Equipment Leaks of VOC From Onshore Natural Gas Processing Plants, published at 40 CFR part 60, subpart KKK, were proposed on January 20, 1984, and promulgated on June 24, 1985. These standards apply to the following affected facilities located at onshore natural gas processing plants: Compressors in VOC service or in wet gas service, and the group of all equipment (except compressors) within a process unit. Affected facilities commenced construction, modification or reconstruction after the date of proposal.

The New Source Performance Standards (NSPS) for Onshore Natural Gas Processing: SO₂ Emissions, published at 40 CFR part 60, subpart LLL, were proposed on January 20, 1984 and promulgated on October 1, 1985. These standards apply to the following affected facilities located at onshore natural gas processing plants: Each sweetening unit, and each sweetening unit followed by a sulfur recovery unit. Affected facilities commenced

construction, modification or reconstruction after the date of proposal.

Owners or operators of affected facilities must submit notifications of any construction/reconstruction, modification, actual date of startup, demonstration of a continuous monitoring system, and date of a performance test. Note that the use of control devices and continuous monitoring is not required by subpart KKK, but is an option for compliance. Owners or operators of affected facilities must submit semiannual reports and performance test results. Note that subpart LLL requires semiannual reporting of excess emissions. Owners or operators subject to subpart KKK must keep various records, including records of leak detection and repair, records of compliance tests, and records of pumps and valves that are exempted from certain monitoring requirements. Owners or operators subject to subpart LLL must keep records of various calculations and measurements.

This information is being collected to determine compliance with NSPS subparts KKK and LLL. Responses to this information collection are deemed to be mandatory, per section 114 (a) of the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 91 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of onshore natural gas processing plants with affected

facilities constructed, reconstructed or modified after January 20, 1984.

Estimated Number of Respondents: 563.

Frequency of Response: On occasion, semiannual.

Estimated Total Annual Hour Burden: 149,174 hours.

Estimated Total Annual Costs: \$9,857,058, which includes \$219,000 annualized capital/startup costs, \$119,700 annual O&M costs, and \$9,518,358 annual labor costs.

Changes in the Estimates: There is an increase of 35,138 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the number of respondents and an adjustment to the recordkeeping and reporting burden.

Dated: October 27, 2004.

Joseph A. Sierra,

Acting Director, Collection Strategies Division.
