The purpose of OSMRE's Federal action is to conduct an analysis of the potential environmental effects of the proposed mining plan for the proposed MTM 1105485–01 lease. OSMRE will use this analysis to inform its recommendation to the Assistant Secretary for Land and Minerals Management, who may approve, disapprove, or approve with conditions the proposed Federal mining plan. Three alternatives are analyzed in the draft EA.

Comments on the FMV and MER received from the public will be considered and incorporated as appropriate into the final written report.

Abstract: Each year, more than 7,000 visitors to the various units of the National Park System file reports of lost or found items. Reporting of lost or found personal property in national parks is governed by 36 CFR 2.22, “Disposition of Property,” which requires unattended property be impounded and deemed to be abandoned unless claimed by the owner or an authorized representative within 60 days. The 60-day period starts upon notification to the rightful owner of the property, if the owner can be identified; or from the time the property was placed in the superintendent’s custody, if the owner cannot be identified.

Unclaimed property must be stored for a minimum period of 60 days. If the item is not claimed by the owner or an authorized representative within the 60-day period, the property may be claimed by the finder, provided the finder is not an employee of the NPS. Found property not claimed by the owner, an authorized representative of the owner, or the finder, shall be deemed abandoned and disposed of in accordance with title 41 of the Code of Federal Regulations.

In order to comply with the requirements of 36 CFR 2.22, the Form 10–166, “Lost–Found Report,” is used by the park to identify personal property reported as lost or found and to return found items to the legitimate owner, or to the finder if the item is not claimed by the owner or their authorized representative. NPS Form 10–166 collects the following information from the visitor filing the report:

- Name, address, city, state, zip code, email address, and contact phone numbers (cell and home).
- Type of item, detailed description of item, and location where the item was last seen or found.
- Photograph of item (if available).

The World Customs Organization (WCO) administers and maintains the Harmonized System and has completed six systematic reviews of the Harmonized System nomenclature since 1988. The reviews are conducted to ensure that the Harmonized System is kept up to date in light of changes in technology or patterns of international trade.

The Harmonized System nomenclature provides uniform product architecture for the customs tariffs and statistical nomenclatures of all major trading countries of the world, including the United States. The
