

operation of the Peach Bottom Unit 1 high-temperature gas reactor, the Shippingport light water breeder reactor, and various Training, Research, and Isotope reactors built by General Atomics (TRIGA reactors). The ISF Facility is designed for the repackaging of specific quantities of this spent nuclear fuel, currently stored by the U.S. Department of Energy (DOE) at the INEEL, into new storage canisters, followed by its placement into an interim dry storage vault, in preparation for eventual shipment to a high-level waste geologic repository. The ISF Facility represents one element of a Settlement Agreement, dated October 17, 1995, among the DOE, the U.S. Navy, and the State of Idaho, regarding waste removal and environmental cleanup at the INEEL.

Following receipt of FWENC's application dated November 19, 2001, the NRC staff published a "Notice of Docketing, Notice of Consideration of Issuance, and Notice of Opportunity for a Hearing for a Materials License for the Idaho Spent Fuel Facility" in the **Federal Register** on June 27, 2002 (67 FR 43358). In conjunction with the issuance of this license, the staff published a final environmental impact statement (FEIS), "Environmental Impact Statement for the Proposed Idaho Spent Fuel Facility at the Idaho National Engineering and Environmental Laboratory in Butte County, Idaho," (NUREG-1773, Final Report, January 2004). A Notice of Availability of the FEIS was published in the **Federal Register** on February 27, 2004 (69 FR 9387). The staff has determined that no significant environmental impacts will be generated as a result of construction and operation of the proposed ISF Facility.

The NRC staff has completed its environmental safeguards, and safety reviews of the Idaho Spent Fuel Facility license application and safety analysis report, as amended. The NRC staff issued Materials License No. SNM-2512 and its Safety Evaluation Report (SER) for the Idaho Spent Fuel Facility on November 30, 2004.

Further details with respect to this action are provided in the application dated November 19, 2001, as amended November 8, 2002, and March 28 and November 14, 2003; the staff's FEIS dated January 2004; Materials License SNM-2512 and the staff's SER, dated November 30, 2004; and other related documents, which are normally available in the records component of NRC's Agencywide Documents Access and Management System (ADAMS). The NRC maintains ADAMS, which provides text and image files of NRC's

public documents. However, as of October 25, 2004, the NRC initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the ADAMS database accessible through the NRC's Web site. Interested members of the public should check the NRC's web pages for updates on the availability of documents through the ADAMS system. When public availability is restored, these documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at: <http://www.nrc.gov/reading-rm/adams.html>. After resumption of public access to ADAMS, copies of the referenced documents will also be available for review at the NRC Public Document Room (PDR), located at 11555 Rockville Pike, Rockville, MD, 20852. PDR reference staff can be contacted at 1-800-397-4209, (301) 415-4737 or by e-mail to pdr@nrc.gov. The PDR reproduction contractor will copy documents for a fee.

Dated at Rockville, Maryland, this 30th day of November, 2004.

For the Nuclear Regulatory Commission.

James R. Hall,

Senior Project Manager, Licensing Section, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-483]

Union Electric Company; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Union Electric Company (the licensee) to withdraw its December 15, 2003, application for proposed amendment to Facility Operating License No. NPF-30 for the Callaway Plant, Unit No. 1, located in Callaway County, Missouri.

The proposed amendment would have revised Technical Specifications (TSs) 3.3.9, "Boron Dilution Mitigation System (BDMS)," and 3.9.2, "Unborated Water Source Isolation Valves." The proposed changes would replace the phrase "unborated water" by the word "dilution" in several places and delete references to isolation valves BGV0178 and BGV0601. A Note would also be added to TS 3.9.2 about dilution source path valves may be unisolated.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on February 3, 2004 (69 FR 5211). However, by letter dated October 29, 2004, the licensee withdrew the proposed change.

For further details with respect to this action, see the licensee's application for amendment dated December 15, 2003, and the licensee's letter dated October 29, 2004, which withdrew the application for a license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room¹ on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or (301) 415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 1st day of December 2004.

For the Nuclear Regulatory Commission.

Jack Donohew,

Senior Project Manager, Section 2, Project Directorate IV, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.
