Bureau of Land Management

[NM–030–5874–EU–038G]

Notice of Realty Action; Proposed Sale of Public Land, New Mexico

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action.

SUMMARY: A parcel of public land in Grant County, New Mexico, is being considered for sale under the provisions of the Federal Land Policy Management Act of 1976 (FLPMA), at no less than the appraised fair market value.

DATES: In order to ensure consideration in the environmental analysis of the proposed sale, comments must be received by December 18, 2008.

ADDRESSES: Written comments concerning this Notice should be addressed to: District Manager, BLM Las Cruces District Office, 1800 Marquess Street, Las Cruces, New Mexico 88005.

FOR FURTHER INFORMATION CONTACT: Lori Allen, Realty Specialist, at the above address or telephone (575) 525–4454.

SUPPLEMENTARY INFORMATION: The following described public land in Grant County, New Mexico is being considered for sale under the authority of section 203 of the FLPMA of 1976, (90 Stat. 2750, 43 U.S.C. 1713):

New Mexico Principal Meridian

T. 18 S., R. 11 W.,

Sec. 7.

T. 18 S., R. 12 W.,

Secs. 1, 2, 3, 8, and 12.

The exact acreage and legal descriptions will be determined by a Cadastral Survey.

The 1993 Mimbres Resource Management Plan identifies these parcels of public land as suitable for disposal. Conveyance of the identified public land will be subject to valid existing rights and encumbrances of record, including but not limited to,

rights-of-way for roads and public utilities. Conveyance of any mineral interests pursuant to section 209 of FLPMA will be analyzed during processing of the proposed sale.

On November 3, 2008, the above-described land will be segregated from appropriation under the public land laws, including the mining laws and mineral leasing laws, except the sale provisions of the FLPMA. Until completion of the sale, the BLM will no longer accept land use applications affecting the identified public land, with the exception of applications for the amendment of previously filed right-of-way applications or existing authorizations to increase the term of the grants in accordance with 43 CFR 2807.15 and 2886.15. The segregative effect will terminate upon issuance of a patent, publication in the **Federal Register** of a termination of the segregation, or November 3, 2010, unless extended by the BLM State Director in accordance with 43 CFR 2711.1–2(d) prior to the termination date.

Public Comments

For a period until December 18, 2008, interested parties and the general public may submit in writing any comments concerning the land being considered for sale, including notification of any encumbrances or other claims relating to the identified land, to the District Manager, BLM Las Cruces District Office, at the above address. In order to ensure consideration in the environmental analysis of the proposed sale, comments must be in writing and postmarked or delivered within 45 days of the initial date of publication of this Notice. Comments transmitted via e-mail will not be accepted. Comments, including names and street addresses of respondents, will be available for public review at the BLM Las Cruces District Office during regular business hours, except holidays.

Individual respondents may request confidentiality. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so. If you wish to have your name or address withheld from public disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Any determination

by the BLM to release or withhold the names or addresses of those who comment will be made on a case-by-case basis.

Such requests will be honored to the extent allowed by law. The BLM will make available for public review, in their entirety, all comments submitted by businesses or organizations, including comments by individuals in their capacity as an official or representative of a business or organization.

(Authority: 43 CFR 2711.1–2)

Bill Childress,

District Manager, Las Cruces.

DEPARTMENT OF THE INTERIOR

National Park Service

Avalanche Hazard Reduction by Burlington Northern Santa Fe Railway in Glacier National Park and Flathead National Forest, MT Final Environmental Impact Statement, Record of Decision, Glacier National Park, MT

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Availability of a Record of Decision on the Final Environmental Impact Statement for the Avalanche Hazard Reduction by Burlington Northern Santa Fe Railway (BNSF) in Glacier National Park and Flathead National Forest, Glacier National Park.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), the National Park Service announces the availability of the Record of Decision for the Avalanche Hazard Reduction by Burlington Northern Santa Fe Railway (BNSF) in Glacier National Park (GNP) and Flathead National Forest, Montana, Final Environmental Impact Statement. On September 12, 2008, the Regional Director, Intermountain Region approved the Record of Decision. As soon as practicable, the National Park Service will begin to implement the Preferred Alternative contained in the FEIS issued on August 2, 2008. Four alternatives were analyzed and Alternative B was identified as the preferred which will include the following actions: GNP will issue a special use permit to BNSF for non-explosive snow stability testing, installation of a weather station and other avalanche forecasting equipment and detection devices in the Middle Fork area within the park. All

installations will be painted to blend in and reduce their visibility. GNP will not permit the use of explosives for avalanche hazard reduction within the park except during emergency extenuating circumstances after all other options, including railroad delays, have been exercised. GNP recommends that BNSF build snowsheds in areas of the John Stevens Canyon that currently do not have them. GNP also recommends that BNSF lengthen existing snowsheds that do not provide sufficient protection from avalanche activity. In the event that BNSF constructs snowsheds, GNP recommends that wildlife crossings be incorporated into the structures where appropriate. Wildlife specialists from GNP, FNF and the USFWS will work closely with BNSF to assist with this effort. GNP also recommends that BNSF design historically compatible extensions on the existing historic snowsheds. Cultural Resource Specialists from both GNP and FNF will assist with this effort. Other alternatives analyzed were: (1) No Action—BNSF would continue to use avalanche forecasting, travel restrictions, and delays to protect employees, freight, equipment and Amtrak passengers; (2) Alternative C—GNP would permit explosive use for up to ten years for avalanche hazard reduction after a commitment from BNSF to build snowsheds and fund a 15 year resource monitoring program; and (3) Alternative D—GNP would permit BNSF to conduct a permanent explosive avalanche hazard reduction program using military artillery in the park. Construction of less than one mile of snowsheds offers the best avalanche protection for Amtrak passengers, BNSF employees, equipment, and freight. Explosive avalanche hazard reduction is an inappropriate use of park lands and may have unacceptable impacts on park resources and values, as defined in the 2006 NPS Management Policies. GNP along with Waterton Lakes National Park is the world's first International Peace Park, an International Biosphere Reserve, and a World Heritage Site. Three comments were received on the Final EIS supporting the preferred alternative. Over 13,000 comments were received on the Draft EIS in addition to 1,100 comments received during scoping.

The public as well as other agencies and tribes were overwhelmingly in support of the preferred alternative. The Record of Decision includes a description of the decision, key actions and mitigation measures, a synopsis of other alternatives considered, the basis for the decision, findings on

impairment, unacceptable impacts and appropriate use of park resources and values, a description of the environmentally preferable alternative, and an overview of public and agency involvement in the decision-making process.

DEPARTMENT OF THE INTERIOR

National Park Service

Final Environmental Impact Statement and General Management Plan; San Juan Island National Historical Park, San Juan County, WA; Notice of Availability

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91-190, as amended), and the Council on Environmental Quality Regulations (40 CFR Part 1500-1508), the National Park Service (NPS), Department of the Interior, has prepared a final environmental impact statement (FEIS) for updating the General Management Plan (GMP) for San Juan Island National Historical Park located in San Juan County, Washington. The current GMP was prepared in 1979. This FEIS describes and analyzes three GMP alternatives that respond to both NPS planning requirements and to the public's concerns and issues, identified during the scoping and public involvement process. Each alternative presents management strategies for resource protection and preservation, education and interpretation, visitor use and facilities, land protection and boundaries, and long-term operations and management of the park. The potential environmental consequences of all the alternatives, and mitigation strategies, are identified and analyzed in the FEIS. In addition to a "no-action" alternative, an "environmentally preferred" alternative is identified.

Proposed Plan and Alternatives: Alternative A constitutes the "no-action" alternative and assumes a

continuation of existing management and trends at San Juan Island National Historical Park. The primary emphasis in current management is placed on the protection and preservation of cultural resources. Since 1966, the park has been listed in the National Register of Historic Places and is a National Historic Landmark. The management of cultural landscapes around the immediate encampment areas at American Camp and English Camp would continue to emphasize cultural landscape management while respecting the natural environment and natural processes. No new construction would be authorized.

Alternative B would increase visitor opportunities and outreach at both English Camp and American Camp, as well as in the town of Friday Harbor through additional visitor facilities, recreational opportunities, programs, and services. Natural and cultural resources interpretation would be enhanced through more extensive facilities and programs. At English Camp, the road system would be reconfigured as a one-way loop road by connecting a road segment approximately one-fifth mile long from the entrance road to the administrative road. The road would follow the existing historic road alignment where possible. The Crook house would be rehabilitated as a visitor contact facility on the ground floor and for administrative use on the second floor. At American Camp, the 1979 double-wide trailer that serves as the temporary visitor center at American Camp would be removed, the site restored to natural conditions, and a new enlarged visitor center would be constructed north of the redoubt. The new visitor center would include space for a collections study room for natural and cultural resource items, including a portion of the military-era collections. The existing road to the redoubt off Pickett's Lane would be removed and converted to a trail. The cultural landscapes would be enhanced to aid visitor understanding and interpretation through a variety of techniques. The prairie would be restored to native plant species. Off-island interpretation would be enhanced through partnerships. The park would propose boundary adjustments at both sites to include important natural and cultural resources related to the purpose of the park.

Alternative C is the agency-preferred alternative as it would broaden the scope of resource management and interpretation programs to emphasize connections and interrelationships between the park's natural and cultural resources. New facilities, trails and
