SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved generic information collection.

This collection follows the guidelines contained in the OMB Resource Manual for Customer Surveys. In accordance with Executive Order 12862, the National Performance Review, and good management practices, NOAA offices seek approval to continue to gather customer feedback on services and/or products, which can be used in planning for service/product modification and prioritization. Under this generic clearance, individual offices would use approved questionnaires and develop new questionnaires, as needed, by selecting subsets of the approved set of collection questions and tailoring those specific questions to be meaningful for their particular programs. These proposed questionnaires would then be submitted to OMB using a fast-track request for approval process, for which separate **Federal Register** notices are not required. Surveys currently being conducted include Web site satisfaction surveys, a Chart Users survey, and a Coastal Services Center Training Evaluation.

The generic clearance will not be used to survey any bodies NOAA regulates unless precautions are taken to ensure that the respondents believe that they are not under any risk for not responding or for the contents of their responses; e.g., in no survey to such a population will the names and addresses of respondents be required.

II. Method of Collection

Information will be collected via mail, email or online.
